2024 CATALOG

TABLE OF CONTENTS

4 More Than Mechanical Engineering...

The ASME Digital Collection is the authoritative, online reference for the mechanical engineering and related research communities. It provides unparalleled depth, breadth, and quality of peer-reviewed content.

5 An Essential Resource for Engineering A Better Future

The ASME Digital Collection is an essential engineering resource that inspires and enables **ground-breaking and incremental advancements and promotes problem solving and collaboration -- enabling us to imagine and realize a better future through engineering.**

6 ASME Content Solutions

Take advantage of preferentially priced product offerings covering ASME's journals, conference proceedings, and eBooks.

7 ASME Codes & Standards for Academia

The ASME Standards Collection is available to all academic libraries through a flexible subscription option.

8 Focus on...Biomedical Journals

Journal of Biomechanical Engineering

Journal of Engineering and Science in Medical Diagnostics and Therapy

Journal of Medical Devices

9 ASME Journal Program

Through rigorous, peer-reviewed vetting, the ASME Journal Program publishes the highest quality research and then makes it available to engineering professionals looking to engineer a better future. Also note *Mechanical Engineering Magazine Select Articles*, feature articles from ASME's flagship magazine *Mechanical Engineering*®, are available online.

21 ASME Conference Proceedings

ASME Conference Proceedings from 2000 -- present, plus select proceedings back to 1955, are currently available through The ASME Digital Collection in the subject disciplines noted in this section.

27 ASME eBooks

The ASME eBook collection offers more than 275 recent and classic ASME eBooks, with selected titles going back to 1944.

34 Librarian Service Center on The ASME Digital Collection

Your destination for important product information, purchase options and availability, admin tools, and discussion papers about issues in librarianship.

36 ASME Digital Collection Poster

A concise list of facts about the Digital Collection

AN ESSENTIAL RESOURCE FOR ENGINEERING A BETTER FUTURE

Dear Colleague,

We take pleasure in presenting the **2024 American Society of Mechanical Engineers (ASME) Digital Collection catalog**. The ASME Digital Collection platform (asmedigitalcollection.asme.org) provides online access to one of the world's leading scientific and technical publishing portfolios. **Our published content is closely aligned with ASME's core mission: to serve as an essential resource for scientists seeking engineering solutions to real world challenges to the benefit of humanity.**

Thankfully the global pandemic is behind us, but it has forced us all to adjust to new realities. Challenges we are facing such as climate change remain an import focus. ASME, like other organizations, has had to rapidly adapt to changing circumstances to continue to provide and improve upon the level of high-quality content and resources for which we are globally recognized.

LISTENING to Our Library Community

ASME prides itself on serving the needs of our library community. As a not-for-profit publisher we are mindful of library budget constraints. ASME Publishing's Library Advisory Board (LAB) was established for the mutual benefit of the library community and ASME. In October 2022, we hosted our fifth annual LAB Meeting, again in a virtual setting. **This successful gathering of academic, corporate, and government librarians continues to foster dialog on current and anticipated library issues and helps inform our publishing decisions.**

EMBRACING Diversity, Equity, and Inclusion and Partnership

Diversity, Equity, and Inclusion continue to be of paramount importance to ASME – and this culture is embraced by the Publishing program that supports, encourages, and celebrates diverse voices.

ASME pledges to deliver high-quality, validated information and we are proud of our continuing partnership with the engineering community. Your resilience during this time of rapid change and disruption is much appreciated. Thank you for your continued business!

Kind regards,
Colin McAteer

Managing Director, Publishing
The American Society of Mechanical Engineers® (ASME®)

MORE THAN MECHANICAL ENGINEERING...

Founded in 1880 as The American Society of Mechanical Engineers, ASME is a not-for-profit professional organization that enables collaboration, knowledge sharing, and skills development across all engineering disciplines, while promoting the vital role of the engineer in society.

ASME publishes some of the **most prestigious engineering content in the world** as one way to fulfill its ongoing mission of being an essential resource for professionals seeking engineering solutions to global challenges.

The ASME Digital Collection provides unparalleled depth, breadth, and quality of peer-reviewed content:

- **ASME's Journals** from 1930 – present
- **ASME's Conference Proceedings** from 2000 – present, plus select proceedings back to 1955
- **ASME's eBooks** from 1993 – present, plus select titles back to 1944

Fostering Interdisciplinary Engineering Collaboration

Beyond mechanical engineering, ASME's expanding publishing program embraces a broad range of engineering disciplines. By supplying high-quality, validated content, it drives innovation by supplying cutting-edge engineering knowledge. This **promotes interdisciplinary problem solving and collaboration – enabling us to imagine and realize a better future through engineering.**

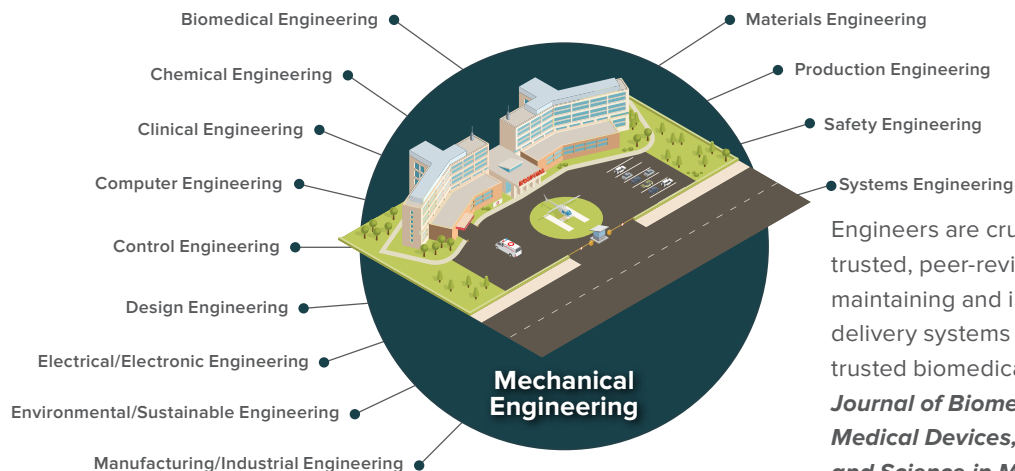

In alignment with ASME's initiative to make content more easily accessible to the engineering community, the **ASME Open Journal of Engineering** was launched in 2022. ASME's first online only, **fully Open Access** journal is a rapid turnaround, multidisciplinary, and rigorously peer-reviewed publication that expands the ASME Journal Program to offer original research across the broad spectrum of all ASME technical communities.

Authors and readers turn to ASME publications because they are a validated and reliable source of information contributing to advancements not only in mechanical engineering, but across the range of engineering specialties.

Features of The ASME Digital Collection include:

- Advanced filtering tools to refine search results by keywords, topics, journal citations, image captions, accepted manuscript, and date range
- Search by Author Affiliation
- Dimensions badges in Journals and Conference Proceedings for quick access to Digital Science citation data
- Topic Collections and Virtual Special Issues in key subject areas
- Indexed in leading abstracting and indexing (A&I) services
- Responsive web pages for better desktop and mobile experience
- Links to CrossRef, Google Scholar, and Web of Science to discover citing articles
- Tools for citation export
- Email alerts for saved searches and newly published content
- COUNTER 5/SUSHI compliant
- Shibboleth institutional login

An Essential Resource For Engineering A Better Future

Engineers are crucial participants in delivering trusted, peer-reviewed research that assists in maintaining and improving medical and healthcare delivery systems around the world. ASME publishes trusted biomedical engineering research in the **Journal of Biomechanical Engineering**, **Journal of Medical Devices**, and the **Journal of Engineering and Science in Medical Diagnostics and Therapy** contributing timely, authoritative, and quality content to global safety, health, and sustainability.

AN ESSENTIAL RESOURCE FOR ENGINEERING A BETTER FUTURE

Global Access

In 2022, **3.5 million users** at more than **2,500 institutions** in over **150 countries** accounted for more than **10.5 million pageviews** across journal articles, conference proceedings papers, and eBook chapters.

Speed to Publication

ASME Publishing continues to **improve the time to publication across the entire ASME Journal Program** while maintaining the integrity, thoroughness, and quality of the peer reviews that define the program.

Authors expect a speedy review of their papers. Currently, the average time for the first round of review is **28 days** and the time for Editor-in-Chief's decision is **70 days** from submission for our newest journal, the *ASME Open Journal of Engineering*.

International Authorship

In 2022, more than **3,200 articles** were published through the **ASME Journal Program** with a global footprint of authors that contributes to and supports the ASME Journal Program.

AUTHORS PER REGION

Expert and Fair Peer Review

In 2022, over **7,620 individuals** served as peer reviewers for the ASME Journal Program.

Reviewers are invited to participate in the ASME Journal Program because of their **expertise in their fields and their ability to offer thorough and accurate criticism of current research** in order to move the knowledge of the world forward to benefit all people.

PEER REVIEWERS PER REGION

ASME CONTENT SOLUTIONS

Take advantage of preferentially priced product offerings covering ASME's journals, conference proceedings, and eBooks.

ASME Journal Program

34 Journals (2000-2023)

Online only – Available via subscription

Print only

Print & online

Journal Archives (1930-1999)

Online only – Available via subscription or one-time purchase

New! 1880 to 1929 content coming in 2024

Mechanical Engineering Magazine Select Articles (Select Articles 1998-2023)

Online only – Available via subscription

ASME Conference Proceedings

All Current Conference Proceedings (2013-2023)

Online only – Available via subscription

Conference Proceedings Archives (2000-2012)

2000-2007 (Archive 1)

New! 2008-2012 (Archive 2)

Plus select proceedings back to 1955

Online only – Available via subscription or one-time purchase

ASME eBook Packages

Annual Subscription (All eBooks as Available)

Online only – Available via subscription

NOW AVAILABLE

Premier ASME Digital Collection

Including the Complete ASME Digital Collection plus Archives, complete Standards Collection, and *Mechanical Engineering Magazine Select Articles*

Online only – Available via subscription

CorporateSelect

This flexible purchase option enables **small corporate customers with a maximum of 50 researchers at a single site and from a single corporate domain** to obtain access to individual journal articles and conference proceedings of interest from The ASME Digital Collection. Packages are available in 100, 200, and 500 increments.

Contact your regional sales representative to discuss your information needs and ASME's content solutions.

Note: Digital publications are also available in print and may be purchased separately or combined with online access (at a discount).

ASME CODES AND STANDARDS FOR ACADEMIA

DELIVER **THE STANDARD** TO YOUR ENGINEERING COMMUNITY

*Did you know that almost 50 percent of early career engineers lack standards knowledge? **

The ASME Standards Collection is available to all academic libraries through a flexible subscription option. This enables access to the most up-to-date collection of Codes and Standards produced by ASME, one of the oldest and most highly regarded international standards developing organizations. Codes and Standards are associated with the art, science, and practice of mechanical engineering, starting in 1914 with the first edition of its legendary Boiler and Pressure Vessel Code.

Users at institutions subscribing to both The ASME Digital Collection and The ASME Standards Collection can navigate between the two platforms with just a single click.

ASME Codes and Standards Standards Collection — New 2023 BPVC Edition

More than 830
Codes and Standards editions currently available in the Collection

Topics span
pressure technology, nuclear plants, elevators/escalators, construction, engineering design, standardization, and engineering drawing

100 countries
currently use the Codes and Standards

Give your engineering community, particularly students, the tools needed to succeed in today’s increasingly competitive employment environment. Equip your users with an understanding of the use of Codes and Standards in different contexts, which will give them a greater and more authentic sense of the world of practice.

“The greatest weaknesses noted by employers of current mechanical engineering graduates, as well as by the early career engineers themselves, were a lack of practical experience in how devices are made or work, **lack of familiarity with Codes and Standards**, and a lack of a systems perspective.”*

*ASME Vision 2030 Survey Feedback

Pioneering modern standards development, these codes enhance public safety and technological advancement to meet the needs of a changing world.

3 packages available:

- 1. BPVC Boiler and Pressure Vessel Code Complete Set**
Pioneering modern standards development, these codes enhance public safety and technological advancement to meet the needs of a changing world.
- 2. Non-Boiler and Pressure Vessel Code Complete Set**
Including Elevators and Escalators (A17 Series); Piping and Pipelines (B31 Series); Bioprocessing Equipment (BPE); Valves, Flanges, Fittings, and Gaskets (B16); Nuclear Quality Assurance (NQA-1); and Performance Test Codes (PTC).
- 3. Complete ASME Standards Collection**
BPVC Boiler and Pressure Vessel Code Complete Set and other Codes and Standards.

“Online access to Codes and Standards dramatically increases their use by students, faculty members, and other researchers. It ensures they have convenient and timely access to the Standards they need, without mediation, at the precise moment they need them.”

-Assistant Professor of Library Science and Engineering Information Specialist at a top-ranking US university (current subscriber)

FOCUS ON... BIOMEDICAL JOURNALS

Journal of Biomechanical Engineering

Editors-in-Chief: Thao (Vicky) Nguyen,

Johns Hopkins University, USA

C. Ross Ethier,

Georgia Institute of Technology & Emory

University School of Medicine, USA

The *Journal of Biomechanical Engineering* reports research results involving the application of mechanical engineering principles to the improvement of human health. The scope of relevant topics ranges from basic biology to biomedical applications and includes theoretical, computational, experimental, and clinical studies.

Scope: Biofluid mechanics, including biomicrofluidic systems; Bioheat and biomass transfer; Biomechanics of reproduction and women's health; Bone biomechanics and mechanobiology; Cardiovascular biomechanics; Cell and tissue engineering; Cell mechanobiology and biomechanics; Gait and kinesiology; Growth and remodeling; Injury biomechanics; Mechanics of biomaterials; Orthopedic biomechanics; Physiological systems; Prosthesis and artificial organs; Pulmonary biomechanics; Soft and hard tissue biomechanics.

ASME Journal of Engineering and Science in Medical Diagnostics and Therapy

Editor-in-Chief: Ahmed Al-Jumaily,

Auckland University of Technology,

New Zealand

The *ASME Journal of Engineering and Science in Medical Diagnostics and Therapy* is a unique publishing forum for the international community of engineers, scientists, and medical researchers with a shared vision to use knowledge from mechanical engineering as well as other engineering and scientific disciplines to accelerate biomedical innovation, trial, and commercialization.

The journal focuses not only on basic, theoretical, or experimental bioengineering research, but also on lab-proven biomedical and biotechnology applications that contribute to achieving T1 translational research objectives and moving research from bench to bedside (T1 transfers knowledge from basic research to clinical research).

Partial Scope: Clinical diagnostics, imaging, and characterization; Clinical applications of biomaterials, chemical processes, and pharmaceuticals; Micro- and nanotechnology in medicine; Computing in medicine and biotechnology; Drug and biological delivery science and biopharmaceuticals; Cancer diagnosis and treatments; Electromechanical and chemical sensors technology; Wave propagations in medical applications. Rehabilitation robots, devices and methodologies; Sports medicine and prevention of impact injury;

Journal of Medical Devices

Editors-in-Chief: Rupak K. Banerjee,

University of Cincinnati, USA

William K. Durfee,

University of Minnesota, USA

The *Journal of Medical Devices* presents publications on applied research and development of new medical devices, including their instrumentation and testing methodologies. Improvement on diagnostic procedures, interventional methods, and therapeutic treatments are emphasized. Special coverage of novel and futuristic devices that allow innovative surgical strategies, methods of drug delivery, or possible reductions in the complexity, cost, or adverse results of health care is encouraged. The Design Innovation Paper category is focused on reporting newer devices for which there may be less extensive clinical or engineering results.

Partial Scope: Orthopedic, cardiovascular, rehabilitation, neurological, urologic, and other medical devices; Bioheat transfer devices; Image-guided interventions and treatments; Endoscopic, laparoscopic, and catheter devices; Tissue-engineered devices; Medical robotics; Medical device design processes; Medical device manufacturing processes; Human factors as related to medical devices; Computational methods for validating and analyzing the performance of medical devices; Virtual prototyping of medical devices; .

ASME JOURNAL PROGRAM

Since its founding in 1880, ASME has published a journal portfolio that is one of the premier research resources for the global engineering community.

Through **rigorous peer review**, the **ASME Journal Program** publishes the highest quality research for engineers looking to keep abreast of current theory, practice, and application.

With the addition of **more than 3,800 published papers each year and growing**, this continually expanding resource serves as one of the many ways that ASME fulfills its mission to advance engineering for the benefit of humanity.

Publishing in ASME journals contributes directly to **career advancement and professional recognition**.

ASME supports compliance with government and funder mandates for Open Access publication and **offers authors the choice to publish their papers Open Access** in all journals with payment of an Article Publishing Charge (APC). ASME also participates in the CHORUS initiative whereby research papers of participating U.S. funders are made available after a one-year embargo. Authors also have the option to archive their final post-refereed manuscripts in an approved repository with permission.

In 2022, ASME published its first online only, fully Open Access journal: **ASME Open Journal of Engineering** and continues to welcome submissions to this multidisciplinary OA journal

Diversity and Inclusion: The Technical Committee on Publications and Communications endorses the commitment of ASME to support diversity and to create and ensure inclusive and ethical practices for publishing as well as the science and engineering professions.

For more information about the ASME Journal Program on The ASME Digital Collection, visit asmedigitalcollection.asme.org/journals

Applied Mechanics Reviews

Editor-in-Chief: Yonggang Huang, Northwestern University, USA

Applied Mechanics Reviews is an international review journal that serves as a premier venue for dissemination of material across all sub-disciplines of applied mechanics and engineering science, including fluid and solid mechanics, heat transfer, dynamics and vibration, and applications. The journal provides an archival repository for state-of-the-art and retrospective survey articles and reviews of research areas and curricular developments. It invites topical reviews that serve to document recent progress in emerging and long-standing areas of applied mechanics; describe analytical, numerical, and experimental techniques; and point to the need for continued research. Also invited is commentary on research and education policy, as well as original tutorial and educational material in applied mechanics targeting non-specialist audiences, including undergraduate and K-12 students.

Scope: State-of-the-art surveys; Retrospective reviews; Curricular reviews; Research and education policy commentary; Tutorials; Experimental mechanics; Theoretical and applied mechanics; Computational mechanics; Engineering science.

ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part B: Mechanical Engineering

Editor-in-Chief: Michael Beer, Leibniz University Hannover, Germany

The *ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part B: Mechanical Engineering* disseminates research findings, best practices and concerns, and discussion and debate on risk and uncertainty related issues. The journal reports on the full range of risk and uncertainty analysis state of art and state of practice relating to mechanical engineering, including but not limited to risk quantification based on hazard identification, scenario development and rate quantification, consequence assessment, valuations, perception, communication, risk-informed decision making, design for resilience, uncertainty analysis and modeling, and other related areas.

Scope: Risk and reliability analysis methods; Uncertainty analysis and quantification; Resilience assessment and design for resilience, Optimization under uncertainty; Computational methods; Applications areas including every aspect of mechanical engineering systems, such as mechanical assets and infrastructure, materials and electromechanical systems, energy, manufacturing, automotive, aerospace, and marine systems, bioengineering, and nuclear engineering.

Part A: Civil Engineering of the *ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems* is published by ASCE, ascelibrary.org/journal/ajrua6, with a scope similar to Part B focusing on civil engineering systems.

ASME Journal of Engineering for Sustainable Buildings and Cities

Editors-in-Chief: Jorge E. Gonzalez, University at Albany, USA

Moncef Krarti, University of Colorado Boulder, USA

ASME Journal of Engineering for Sustainable Buildings and Cities is the primary, high-quality resource for dissemination of research on integrated and sustainable building equipment and systems (ISBES) for individual buildings, as well as urban centers. The main topics of the journal are related to sustainable, resilient, and smart building energy systems including, but not limited to innovative technologies to integrate various building components, accurate energy equipment and building energy modeling tools, efficient combined heat and power, cost-effective building-specific energy storage systems (i.e., passive and active technologies), advanced optimized control strategies for operating mechanical energy systems in buildings, and grid-interactive buildings. In addition, the journal considers new equipment, systems, and methods that can enhance the resiliency of buildings associated to climate change and recurrent extreme events.

In particular, the journal disseminates new developments of energy efficient heating and cooling systems that are able to adapt to large variations in weather conditions especially in urban areas.

Scope: Design, development, and research of sustainable and resilient mechanical systems and equipment for buildings; Machine learning and AI Applications in Buildings; Building envelope technologies; Smart building structures; Power equipment and technologies for buildings; Equipment for heating, ventilation, and air conditioning; Control theory and practice for buildings equipment and systems; District cooling and heating for buildings; Energy engineering of high rise buildings; Management of building energy loads; Equipment and systems for indoor air quality; Sensor systems for building equipment and systems; Energy harvesting for buildings and cities; Smart energy systems for buildings, cities, and grids; Hydronics systems for buildings; Fire science and fire-protection systems for buildings; Simulation of building equipment and systems; Elevators and building mobility systems; Architecture of sustainable and resilient building equipment and systems; Renewable energy systems for buildings; Economics of buildings equipment and systems.

ASME Letters in Dynamic Systems and Control

Editor-in-Chief: Peter H. Meckl, Purdue University, USA

ASME Letters in Dynamic Systems and Control offers rapid dissemination of novel, high-quality, cutting-edge original findings on theoretical or applied topics from the dynamics and control community. Papers are subjected to ASME's standard high-quality peer review process.

Submissions are limited to 2500-5000 words (approximately 3-6 pages) with rapid online publication of accepted papers targeted within six weeks of submission. This Letters journal publishes the state of the art in dynamic systems and control research, with a focus on topics of interest to the dynamic systems and control community. *ASME Letters in Dynamic Systems and Control* provides the global engineering community with a forum to communicate the emerging research ideas that will shape the future efforts in dynamic systems and control.

Scope: Topics include, but not limited to: Modeling; Identification; Diagnostics; Intelligent systems; Mechatronics; Automotive and transportation systems; Biosystems and health care; Energy systems; Robotics; Vibrations; Smart structures.

ASME Open Journal of Engineering

Editor-in-Chief: Hameed Metghalchi, Northeastern University, USA

ASME Open Journal of Engineering is a rapid turnaround, multidisciplinary, open access, and rigorously peer-reviewed publication that expands the ASME Journal Program to offer original research across the broad spectrum of all ASME technical communities.

ASME Open Journal of Engineering offers: high-impact, innovative articles that expand the scope of ASME's traditional journals, including cross-cutting or multidisciplinary research in new or emerging areas; original findings on theoretical or applied topics related to mechanical engineering and allied disciplines; new or improved engineering methods and solutions; and compliance with funder mandates that require full open access.

Scope: Addresses the foundations and boundaries of: Advanced Energy Systems; Aerospace; Applied Mechanics; Bioengineering; Computers and Information in Engineering; Design Engineering; Dynamic Systems and Control; Electronic and Photonic Packaging; Energy Resources and Power Generation; Engineering Education; Environmental Engineering; Fluid Power Systems; Fluids Engineering; Gas Turbines; Heat Transfer; Internal Combustion Engines; Management; Manufacturing; Materials; Materials Handling; Microelectromechanics; Nanotechnology; Noise Control and Acoustics; Nondestructive Evaluation; Nuclear Engineering; Ocean, Offshore, and Arctic Engineering; Pipeline Systems; Plant Engineering and Maintenance; Pressure Vessels and Piping; Process Industries; Rail Transportation; Robotics and Automation; Safety and Risk Analysis; Solar Energy; Solid Waste Processing; Sustainable Engineering; Tribology.

2024: Volume 3

Journal of Applied Mechanics

Editor-in-Chief: Pradeep Sharma, University of Houston, USA

The *Journal of Applied Mechanics* serves as a vehicle for the communication of original research results of permanent interest in all branches of mechanics. The majority of the papers published in the journal are full-length articles of considerable depth. Comments on published papers may be submitted in the form of discussion, which is subject to a rebuttal by the author.

Scope: All areas of theoretical and applied mechanics including, but not limited to: Aerodynamics; Aeroelasticity; Biomechanics; Boundary layers; Composite materials; Computational mechanics; Constitutive modeling of materials; Dynamics; Elasticity; Experimental mechanics; Flow and fracture; Heat transport in fluid flows; Hydraulics; Impact; Internal flow; Mechanical properties of materials; Mechanics of shocks; Micromechanics; Nanomechanics; Plasticity; Stress analysis; Structures; Thermodynamics of materials and in flowing fluids; Thermo-mechanics; Turbulence; Vibration; Wave propagation.

Journal of Autonomous Vehicles and Systems

Editors-in-Chief: Vladimir V. Vantsevich, The University of Alabama at Birmingham, USA

The purpose of *Journal of Autonomous Vehicles and Systems* is to provide an international platform for the communication and discussion of technical knowledge and solutions in the transformative areas of the research and engineering design of autonomous vehicles and systems that operate in all media and inter-medium environments: ground, air, space, and water.

The focus of this journal is on an autonomous vehicle system-of-systems approach to modeling, simulation, design, and physical and virtual testing. The vehicle applications include, but are not limited to personal and cargo transportation, construction and forestry, farming, scientific research, investigation of the underground, air and water, exploration of other planets, infrastructure monitoring, surveillance, and military, etc.

Partial Scope: Artificial intelligence and machine learning with application to autonomous vehicles; Artificial intelligence mimicking human intelligence for self-operation, shared mental and cooperative multi-physics environment models; Intelligent perception and cognitive architectures for autonomous operation, planning, global positioning, navigation and localization, decision making, controls and observation; Modeling, simulation and designing autonomous vehicle systems for their autonomy of different levels; Vehicle-to-X interaction with X being Human, Vehicle, Infrastructure, etc.; Operator-vehicle interaction.

Journal of Computational and Nonlinear Dynamics

Editor-in-Chief: Bogdan I. Epureanu, University of Michigan, USA

The *Journal of Computational and Nonlinear Dynamics* provides a medium for rapid dissemination of original research results in computational dynamics and nonlinear dynamics. The journal serves as a forum for the exchange of new ideas and applications in computational dynamics, multi-body system dynamics, and all aspects (analytical, numerical, and experimental) of dynamics associated with nonlinear systems. The broad scope of the journal encompasses all computational problems and nonlinear problems, which occur in aeronautical, biological, civil, electrical, marine, mechanical, physical, and structural systems. For more information, please visit the companion website at www.asmejcnd.org.

Scope: Topics in the computational dynamics and multi-body system dynamics area include as follows: Theoretical, computational, and experimental methods; Novel formulations and algorithms for computation of kinematics and dynamics of rigid and flexible systems; Application of finite element and finite difference methods in dynamics; Numerical approaches in synthesis, optimization, and control; Parallel computations and software development. Topics in the nonlinear dynamics area include as follows: New theories and principles related to dynamical systems; Computational techniques for nonlinear systems; Dynamic stability, bifurcation, and control; Chaos, fractals, and pattern formation in physical and biological systems; System modeling, identification, and experimental methods; Frictional and discontinuous dynamical processes.

Journal of Biomechanical Engineering
 Refer to page 8 for information

Journal of Computing and Information Science in Engineering

Editor-in-Chief: Yang Wang, Georgia Institute of Technology, USA

The *Journal of Computing and Information Science in Engineering (JCISE)* publishes articles related to algorithms, computational methods, computing infrastructure, computer-interpretable representations, human-computer interfaces, information science, and/or system architectures that aim to improve some aspect of product and system lifecycle (e.g., design, manufacturing, operation, maintenance, disposal, recycling, etc.). Applications considered in JCISE manuscripts should be relevant to the mechanical engineering discipline. Papers can be focused on fundamental research leading to new methods or adaptation of existing methods for new applications.

Partial Scope: Advanced computing infrastructure; Artificial intelligence; Big data and analytics; Computer-aided design; Computer-aided manufacturing; Computational foundations for additive manufacturing; Computational foundations for engineering optimization; Computational geometry; Computational metrology; Computational synthesis; Cybermanufacturing; Cyber-physical security for factories; Cyber-physical system design and operation; Data-driven engineering applications; Engineering informatics; Geometric reasoning; GPU computing for design and manufacturing; Human-computer interfaces/interactions; Industrial internet of things; Inverse methods for engineering applications; Machine learning for engineering applications; Manufacturing planning; Model-based systems engineering; Multiphysics modeling and simulation; Multiscale modeling and simulation; Multidisciplinary optimization; Process modeling for engineering applications; Symbolic computing for engineering applications; Tolerance modeling; Topology and shape optimization; Virtual and augmented reality environments; Virtual prototyping.

Journal of Dynamic Systems, Measurement, and Control

Editor-in-Chief: Ranjan Mukherjee, Michigan State University, USA

The *Journal of Dynamic Systems, Measurement, and Control* publishes original papers, both theoretical and applied, focusing on modeling, sensing, identification, and control of dynamical systems in traditional mechanical engineering and associated interdisciplinary areas. Theoretical papers should present new theoretical developments and knowledge for control of dynamical systems together with clear engineering motivation for the new theory. New theory or results that are only of mathematical interest without a clear engineering motivation or have a cursory relevance only are discouraged. "Application" is understood to include simulation of realistic systems and corroboration of theory with emphasis on demonstrated practicality.

Scope: Adaptive control; Aerospace systems; Automotive systems; Biosystems; Computer control; Control based on data analytics and machine learning; Distributed parameter systems and control; Energy systems and control; Fluid control systems; Instrumentation and components; Manufacturing technology; Mechatronics; Modeling and identification; Nonlinear systems and control; Optimal control; Power systems; Production systems; Real-time control; Robotics; Robust control; Servomechanisms; Signal processing; Systems theory; Transportation systems; Uncertain systems.

Journal of Electrochemical Energy Conversion and Storage

Editor-in-Chief: Partha P. Mukherjee, Purdue University, USA

The *Journal of Electrochemical Energy Conversion and Storage* is a multidisciplinary journal publishing original research covering all engineering aspects including materials, chemistry, and physics related to electrochemical energy conversion and storage. The journal focuses on processes, materials, components, devices, and systems that store and convert electrical and chemical energy. The journal publishes peer-reviewed, archival scholarly articles, research papers, technical briefs, review articles, perspective articles and focused issues.

Scope: Specific areas of interest include Electrochemical engineering; Electrochemical Energy Storage, Electrochemical Conversion, Novel materials; Analysis and design of components, devices, and systems; Balance of plant; Novel numerical and analytical simulations; Advanced materials characterization; Innovative material synthesis and manufacturing methods; Thermal management; Reliability, durability, and damage tolerance. Papers are solicited in, but not limited to, the following technological areas: Batteries; Flow batteries; Fuel cells; Electrolyzers; Electrochemical separation membranes; Electrochemical capacitors; Thermogalvanic cells; Photoelectrochemical cells.

Journal of Electronic Packaging

Editor-in-Chief: Shi-Wei Ricky Lee,
The Hong Kong University of Science and
Technology, Hong Kong

The *Journal of Electronic Packaging* publishes papers that use experimental and theoretical (analytical and computer-aided) methods, approaches, and techniques to address and solve various mechanical, materials, and reliability problems encountered in the analysis, design, manufacturing, testing, and operation of electronic and photonics components, devices, and systems.

The journal serves researchers and engineers working in academic and industrial settings. In addition, leaders in the field are invited to publish review articles on hot, emerging and fundamental topics.

Scope: Flexible electronics; Materials with nano structures; Applied mechanics; Microsystems packaging; Systems integration; General small-scale systems.

Journal of Energy Resources Technology

Editors-in-Chief: Tatiana Morosuk,
Technische Universität Berlin, Germany

Ray Rui, China University of Petroleum-Beijing, China

The *Journal of Energy Resources Technology* disseminates technical information – peer-reviewed scholarly work, research papers, technical briefs, feature articles, and authoritative review articles – of permanent interest to the journal’s readership. Emphasis is given to extraction and conversion of chemical, thermal, and renewable energies to mechanical and electrical forms of energy, including geothermal energy extraction technologies, gas hydrate extraction technology, carbon dioxide capture, utilization and storage, advanced power cycle, and the relationship between energy source and environment, including sustainability aspects and economic and policy assessment of energy issues.

A small number of published papers describe case histories, review recent advanced technologies, or describe a new methodology/ industrial process. Discussion papers addressing energy policy or regulatory issues that affect energy resources and energy demand and supply are also published. Papers that do not include original work, but nonetheless present quality analysis or increment improvement to past work, may be published as technical briefs.

Scope: Specific areas of importance including, but not limited to: Fundamentals of thermodynamics such as energy, entropy and exergy, and laws of thermodynamics; Thermoeconomics; Alternative and renewable energy sources; Energy conversion processes such as chemical looping combustion, internal combustion engines, power plants, and refrigeration systems; Mechanical, thermal, and chemical energy storage systems; Fundamentals of fuel combustion including chemical kinetics; Energy resource recovery from biomass and solid waste; Onshore and offshore well drilling; Production and reservoir engineering.

Journal of Engineering for Gas Turbines and Power

Editor-in-Chief: Jerzy T. Sawicki, Cleveland State University, USA

The *Journal of Engineering for Gas Turbines and Power* publishes original papers, both theoretical and applied, in the broad technical areas of gas and steam turbines, aircraft engines, internal combustion engines, and power generation. It covers the specific technical areas described in the Scope section below. Research papers are peer-reviewed full-length articles of considerable depth. The journal also publishes technical briefs, design innovation papers, topical reviews, discussions of published papers, book reviews, and editorials. Papers of high mathematical interest must also have a strong relevance to engineering.

Scope: Aircraft engines; Coal, biomass and alternative fuels; Combustion, fuels and emissions; Compressor stall and surge; Computational fluid dynamics (CFD) analysis; Controls, diagnostics, instrumentation, and measurement techniques; Cycle innovations; Diffuser and exhaust systems; Energy conversion, thermodynamic cycles and power plants; Heat transfer and thermal management; Internal combustion engines; New and emerging technologies; Oil and gas applications; Power generation plants; Steam turbines; Structures and dynamics including rotordynamics, bearings and seals, blading and aeromechanics; Compressor and mechanical design and performance applied to turbomachinery.

Journal of Engineering and Science in Medical Diagnostics and Therapy
Refer to page 8 for information

Journal of Engineering Materials and Technology

Editor-in-Chief: Abigail Hunter, Los Alamos National Laboratory, USA

The *Journal of Engineering Materials and Technology* is a global publishing forum that addresses a broad spectrum of issues focused on interrelated experimental, computational, and theoretical studies on mechanics of materials perspectives and fundamental understanding of the behavior of metals, polymers, ceramics, composites, biomaterials, and nanostructured materials at physical scales ranging from the atomistic to the macro.

Scope: Multiscale modeling and experiments; High-temperature creep, fatigue, and fracture; Elastic-plastic behavior; Dynamic behavior; Environmental effects on material response, constitutive relations, materials processing, and microstructural thermomechanical behavior.

2024: Volume 146, 4 issues

Journal of Fluids Engineering

Editor-in-Chief: Francine Battaglia, University at Buffalo, USA

The *Journal of Fluids Engineering* disseminates technical information in fluid mechanics of interest to researchers and designers in mechanical engineering and other engineering disciplines. The majority of papers present original analytical, numerical, or experimental results and physical interpretation of lasting scientific value. In addition, contributions to the journal emphasize investigative techniques, analytical methods, computational fluid dynamics, and experimental methods such as laser Doppler velocimetry, hot film and hot wire anemometry, particle image velocimetry, and other innovative advances as they appear.

Scope: Aerodynamics; Boundary layers; Bubbly flows; Cavitation; Compressible flows; Convective heat/mass transfer as affected by fluid flow; Duct and pipe flows; Free shear layers; Flows in biological systems; Fluid-structure interaction; Fluid transients and wave motion; Jets; Microfluidics; Multiphase flows; Naval hydrodynamics; Pumps; Sprays; Stability and transition; Turbines; Turbulence; Wakes; Other fundamental/applied fluid mechanical phenomena and processes.

Journal of Heat and Mass Transfer

Editor-in-Chief: Timothy S. Fisher, University of California Los Angeles, USA

The *Journal of Heat and Mass Transfer* disseminates information of permanent interest in the areas of heat and mass transfer. Contributions may consist of results from fundamental research that apply to thermal energy or mass transfer in all fields of mechanical engineering and related disciplines. Also, archival results of research that focus on the evaluation of thermophysical properties associated with heat and mass transfer, as well as on the theory of heat and mass transfer, are published. The journal publishes papers contributing to the advancement of our fundamental knowledge of the fields of heat and mass transfer and related novel applications in technologies.

The *Journal of Heat and Mass Transfer* is complementary to the *Journal of Thermal Science and Engineering Applications*, which focuses on applications.

Partial Scope: Topical areas including, but not limited to: Biological heat and mass transfer; Combustion and reactive flows; Conduction; Electronic and photonic cooling; Evaporation, boiling, and condensation; Experimental techniques; Forced convection; Heat exchanger fundamentals; Heat transfer enhancement; Combined heat and mass transfer; Heat transfer in manufacturing; Jets, wakes, and impingement cooling; Melting and solidification; Microscale and nanoscale heat and mass transfer; Natural and mixed convection; Porous media; Radiative heat transfer; Thermal systems; Two-phase flow and heat transfer; Solar-thermal processes; Thermal systems; Two-phase flow and heat transfer. Such topical areas may occur in applications involving: Aeronautics and astronautics; The environment; Gas turbines; Biotechnology; Electronic and photonic devices; Energy systems; Fire and combustion; Heat pipes; Manufacturing and materials processing; Low-temperature heat transfer; Refrigeration and air conditioning; Multiphase processes; Solar-thermal energy devices; Microscale and nanoscale devices and processes.

Journal of Manufacturing Science and Engineering

Editor-in-Chief: Albert Shih, University of Michigan, USA

The *Journal of Manufacturing Science and Engineering* disseminates original, theoretical, and applied research results of permanent interest in all branches of manufacturing including emerging areas. Research papers are peer-reviewed full-length articles of considerable depth. The journal also publishes technical briefs, design innovation papers, reviews, discussions of published papers with rebuttal, book reviews, and editorials. The Editorial Board consists of a team of international experts who provide expertise and conduct the peer-review process for the different topical areas covered by the journal.

Partial Scope: Areas of interest including, but not limited to: Additive manufacturing; Advanced materials and processing; Assembly; Biomedical manufacturing; Bulk deformation processes (e.g., extrusion, forging, wire drawing, etc.); CAD/ CAM/CAE; Computer-integrated manufacturing; Control and automation; Cyber-physical systems in manufacturing; Data science-enhanced manufacturing; Design for manufacturing; Inspection and quality control; Laser processes; Robotics and flexible tooling; Semiconductor manufacturing; Smart manufacturing; Sustainable manufacturing.

Journal of Mechanical Design

Editor-in-Chief: Carolyn Conner Seepersad, The University of Texas at Austin, USA

Editor, Mechanisms: Qiaode Jeffrey Ge, State University of New York at Stony Brook, USA

The *Journal of Mechanical Design (JMD)* serves the broad design community as the venue for scholarly, archival research in all aspects of the engineering design activity and welcomes contributions from all areas of design with an emphasis on design synthesis. While the journal has traditionally served the ASME Design Engineering Division, it embraces interdisciplinary design research topics and encourages submissions from teams of interdisciplinary researchers who work on theories and methods to support the design of emerging engineered products and systems. The journal communicates original contributions, primarily in the form of research articles of considerable depth, but also technical briefs, design innovation papers, book reviews, review articles on research topics or history of engineering design, and editorials. For more information, visit the companion website at www.asmejmd.org

Partial Scope: Design automation, including design representation, virtual reality, geometric design, design evaluation, design optimization, data-driven design, artificial intelligence in design, simulation-based design under uncertainty, design of complex systems, design of engineered materials systems, shape and topology optimization, ergonomic and aesthetic considerations in design methodology, and design for market systems; Design of power transmission systems; with an orientation towards interdisciplinary research on design and optimization of such systems and with an emphasis on new emerging techniques and novel mechanisms; Design of energy, fluid, and power handling systems; Design innovation and devices, including design of smart products and materials; Design of mechanisms and robotic systems, including design of macro-, micro- and nano-scaled mechanical systems, machine and robotic components, and machine system design;

Journal of Mechanisms and Robotics

Editor-in-Chief: Venkat N. Krovi, Clemson University, USA

The *Journal of Mechanisms and Robotics* publishes research contributions to the fundamental theory, algorithms, and applications for mechanisms, machine systems, and robotics. For more information, visit the companion website at www.asmejmr.org.

Scope: Fundamental theory, algorithms, design, manufacture, and experimental validation for macro-, micro- and nano-scaled mechanical systems and robots; Theoretical and applied kinematics; Mechanism synthesis and design; Analysis and design of robot manipulators, mobile robots, hands and legs, soft robotics, compliant mechanisms, origami and folded robots, 3D printed robots, exoskeletons, and haptic devices; Novel fabrication; Actuation and control techniques for mechanisms and robotics; Bio-inspired approaches to mechanism and robot design; Mechanics and design of micro- and nano-scale devices.

Journal of Micro- and Nano-Manufacturing

Editor-in-Chief: Stefan Dimov, University of Birmingham, England

The *Journal of Micro- and Nano-Manufacturing* provides a forum for the rapid dissemination of original theoretical and applied research in the areas of micro- and nano-manufacturing that are related to process innovation, accuracy and precision, throughput enhancement, material utilization, compact equipment development, environmental and lifecycle analysis, and predictive modeling of manufacturing processes with feature sizes less than one hundred micrometers. Papers addressing special needs in emerging areas, such as biomedical devices, drug manufacturing, water and energy, are also included.

Scope: Areas of interest including, but not limited to: Unit micro- and nano-manufacturing processes; Hybrid manufacturing processes combining bottom-up and top-down processes; Hybrid manufacturing processes utilizing various energy sources (optical, mechanical, electrical, solar, etc.) to achieve multi-scale features and resolution; High-throughput micro- and nano-manufacturing processes; Equipment development; Predictive modeling and simulation of materials and/or systems enabling point-of-need or scaled-up micro- and nano-manufacturing; Metrology at the micro- and nano-scales over large areas; Sensors and sensor integration; Design algorithms for multi-scale manufacturing; Life cycle analysis; Logistics and material handling related to micro- and nano-manufacturing

Journal of Nanotechnology in Engineering and Medicine

As of January 1, 2016, the *Journal of Nanotechnology in Engineering and Medicine* has suspended publication.

The *Journal of Nanotechnology in Engineering and Medicine* covered advancements in nanoscience and applications of nanostructures and nanomaterials to the creative conception, design, development, analysis, control, and operation of devices and technologies in engineering, medical, and life science systems. High-quality contributions of three types were sought: original research reports addressing nanoscale phenomena, synthesis and analysis of nanomaterials and devices, and applications of these; reviews of emerging nanotechnology topics and research needs to impact engineering and medicine; and opinions/views on the developments and potential applications of nanoscience, engineering, and technology.

Journal of Nondestructive Evaluation, Diagnostics and Prognostics of Engineering Systems

Editor-in-Chief: Tribikram Kundu, The University of Arizona, Tucson, USA

The *Journal of Nondestructive Evaluation, Diagnostics and Prognostics of Engineering Systems* provides a venue for communication, discussion, and dissemination of advanced research related to ideas, opinions, and solutions on a variety of subjects related to NDE (Nondestructive Evaluation), SHM (Structural Health Monitoring), and prognosis. The journal addresses the need for an archival international journal and covers many aspects of interdisciplinary work in the fields of NDE and SHM and reports use of NDE and SHM in a wide range of applications in industry, government sector, and academia. The goal of the journal is to inform readers with state-of-the-art developments in NDE, SHM, and prognosis, disseminate new ideas on these subjects, and report related valuable applications. It is envisioned that the journal brings under one umbrella engineering and science disciplines contributing to NDE, SHM, and prognosis and features practical applications of NDE and SHM in many technical fields.

Scope: Applications across all engineering systems and processes; Fault and damage identification; Networked systems; On-line and off-line diagnostic approaches; Physics of failure in engineering systems; Product quality control; Real-time data processing, storage, and reduction; Sensors and other electronic hardware; System and structural diagnostics in harsh or extreme environments; Theoretical developments, numerical analysis (i.e., finite element, boundary element, peridynamics, and peri-ultrasound-based modeling techniques), and hardware-in-the-loop simulations supporting NDE and SHM methodologies; Traditional and emerging technologies (ultrasonics, radiography, etc.).

Journal of Nuclear Engineering and Radiation Science

Editor-in-Chief: Igor Pioro, University of Ontario Institute of Technology, Canada

The *Journal of Nuclear Engineering and Radiation Science* is ASME's latest title within the energy sector. The publication is for specialists in the nuclear/power engineering areas of industry, academia, and government.

Scope: Areas of interest including, but not limited to: Next generation reactors and advanced reactors; Thermal hydraulics; Computational Fluid Dynamics (CFD) and coupled codes; Reactor physics and transport theory; Nuclear fuel and materials; Fuel cycle, radioactive waste management, and decommissioning; Instrumentation & Controls (I&C); Nuclear safety and security; Beyond design basis events; Codes, standards, licensing, and regulatory issues; Radiation protection and nuclear technology applications; Plant operations, maintenance, engineering, modifications, and lifecycle; Plant systems, construction, structures, and components; Nuclear education, public acceptance, and related issues; Fusion engineering; Panel discussion.

Journal of Offshore Mechanics and Arctic Engineering

Editor-in-Chief: Lance Manuel, The University of Texas at Austin, USA

The *Journal of Offshore Mechanics and Arctic Engineering* is an international resource for original peer-reviewed research that advances the state of knowledge on all aspects of analysis, design, and technology development in ocean, offshore, arctic, and related fields. Its goals are to provide a forum for timely and in-depth exchanges of scientific and technical information among researchers and engineers. The journal emphasizes fundamental research and development studies as well as review articles that offer retrospective perspectives on well-established topics or exposures to innovative developments. The journal also documents significant developments in related fields and major accomplishments of renowned scientists by programming themed issues that record such events

Scope: Offshore mechanics, fixed and floating production systems; Ocean engineering, hydrodynamics, and ship motions; Ocean climate statistics, storms, extremes, and hurricanes; Structural mechanics; Integrity management, data analytics, health monitoring, cyber-physical systems, digital twins; Safety, reliability, risk assessment, and uncertainty quantification; Riser mechanics, cable and mooring dynamics, and pipeline and subsea technology; Materials engineering, fatigue, fracture, non-destructive testing, inspection technologies, and corrosion protection and control; Fluid-structure interaction, computational fluid dynamics, and flow- and vortex-induced vibrations; Marine and offshore geotechnics, soil mechanics, and soil-pipeline interaction; Ocean renewable energy; Ocean space utilization, the blue economy, deep-sea mining, sustainability, aquaculture engineering, marine litter/debris solutions; Polar and arctic science and technology, ice mechanics, arctic structures, ice-structure and ship interaction, permafrost engineering, and arctic and thermal design.

Journal of Pressure Vessel Technology

Editor-in-Chief: Spyros A. Karamanos, University of Thessaly, Greece

The *Journal of Pressure Vessel Technology* is the premier publication for the highest quality research and interpretive reports on the design, analysis, materials, fabrication, construction, inspection, operation, and failure prevention of pressure vessels, piping, pipelines, power and heating boilers, heat exchangers, reaction vessels, pumps, valves, and other pressure and temperature-bearing components, as well as the nondestructive evaluation of critical components in mechanical engineering applications. It publishes analytical, experimental, and numerical studies.

Not only does the journal cover all topics dealing with the design and analysis of pressure vessels, piping, and components, but it also contains discussions of their related Codes and Standards.

Scope: Applicable pressure technology areas of interest include: Dynamic and seismic analysis; Equipment qualification; Fabrication; Welding processes and integrity; Joining and fastening; Operation of vessels and piping; Fatigue and fracture prediction; Fluid-structure interaction; High pressure engineering; Elevated temperature analysis and design; Inelastic analysis; Life extension; Lifeline earthquake engineering; PVP materials and their property databases; NDE; Safety and reliability; Verification and qualification of software.

eISSN: 1528-8978
asmedigitalcollection.asme.org/pressurevesseltech

Journal of Solar Energy Engineering

Editor-in-Chief: S.A. Sherif, University of Florida, USA

The *Journal of Solar Energy Engineering* — Including Wind Energy and Building Energy Conservation — publishes research papers that contain original work of permanent interest in all areas of solar energy, wind energy, and energy conservation, as well as discussions of policy and regulatory issues that affect renewable energy technologies and their implementation. Papers that do not include original work, but nonetheless present quality analysis or incremental improvements to past work may be published as Technical Briefs. Review papers are accepted but should be discussed with the Editor prior to submission. The journal also publishes a section called Solar Scenery that features photographs or graphical displays of significant new installations or research facilities.

Scope: Fundamentals; Solar optics; Solar collectors; Solar thermal power; Photovoltaic applications; Solar chemistry and bioconversion; Solar space applications; Wind energy; Heating and cooling; Energy storage; Testing and measurement; Conservation and solar buildings; Emerging technologies; Energy policy.

Journal of Thermal Science and Engineering Applications

Editor-in-Chief: Srinath Ekkad, North Carolina State University, USA

The *Journal of Thermal Science and Engineering Applications* focuses on the dissemination of information of permanent interest in applied thermal sciences and engineering emphasizing new and emerging technologies, significant questions, pressing problems and concerns, and new methods and approaches that can be applied to industrial problems.

Contributions must have clear relevancy to an industry, an industrial process, or a device. Subject areas could be as narrow as a particular phenomenon or device or as broad as a system. The journal publishes original research of an applied nature; application of thermal sciences to processes or systems; technology reviews; and identification of research needs to solve industrial problems at all time and length scales. Contributions should describe research in applied areas pertaining to thermal energy transport in equipment and devices, thermal and chemical systems, and thermodynamic processes.

The *Journal of Thermal Science and Engineering Applications* complements the *Journal of Heat and Mass Transfer*, which focuses on fundamental research.

Scope: Applications in: Aerospace systems; Gas turbines; Biotechnology; Defense systems; Electronic and photonic equipment; Energy systems; Manufacturing; Refrigeration and air conditioning; Homeland security systems; Micro- and nanoscale devices; Petrochemical processing; Medical systems; Energy efficiency; Sustainability; Solar systems; Combustion systems.

Journal of Tribology

Editor-in-Chief (through 2023): Farshid Sadeghi, Purdue University, USA

The *Journal of Tribology* publishes outstanding peer-reviewed technical articles of permanent interest to the tribology community annually. Known as a premier journal in the field, it attracts articles by tribologists from around the world. The journal features a mix of experimental, numerical, and theoretical articles dealing with all aspects of the field. In addition to being of interest to engineers and other scientists doing research in the field, the journal is also of great importance to engineers who design or use mechanical components such as bearings, gears, seals, magnetic recording heads and disks, or prosthetic joints, or who are involved with manufacturing processes.

Scope: Friction and wear; Fluid film lubrication; Elastohydrodynamic lubrication; Surface properties and characterization; Contact mechanics; Magnetic recordings; Tribological systems; Seals; Bearing design and technology; Gears; Metalworking; Lubricants; Artificial joints.

2024: Volume 146, 12 issues

eISSN: 1528-8897
asmedigitalcollection.asme.org/tribology

Journal of Turbomachinery

Editor-in-Chief: David G. Bogard, The University of Texas at Austin, USA

The *Journal of Turbomachinery* publishes technical studies that advance the state of the art of turbomachinery technology, particularly those related to gas turbine engines. Papers include theoretical, analytical, computational, and experimental studies which provide insight into improved performance or predictions of performance for gas turbine engines or various components of these engines. Basic engineering sciences in these studies include fluid dynamics, heat transfer, and aeromechanics technology. Emphasis is placed on gas-path flows associated compressors, combustors, and turbines, and with associated cooling technologies.

Scope: Aerodynamic design, analysis, optimization, and testing of compressor and turbine airfoils; Compressor stall, surge, and operability issues; Turbine cooling including internal and film cooling design, analysis, optimization, and testing; Cavity and leakage flows; Aeromechanical instabilities; Computational fluid dynamics (CFD) applied to turbomachinery; and Turbine testing with associated measurement techniques and instrumentation development.

2024: Volume 146, 12 issues

Journal of Verification, Validation and Uncertainty Quantification

Editor-in-Chief: Christopher J. Freitas, Southwest Research Institute, USA

The *Journal of Verification, Validation and Uncertainty Quantification (VVUQ)* disseminates original research in the development and application of methods for performing code and solution (calculation) verification, simulation validation, and simulation and experimental uncertainty quantification. The application of verification, validation, and uncertainty quantification to discipline-specific examples are considered important contributions to this journal. Validation experiments and data uncertainty, simulation challenge problems, new approaches to VVUQ, discipline-specific examples and methods, and developments in and demonstration of standards of practice for verification and validation are examples of relevant topics to this journal.

The journal is cross cutting and serves a broad audience of engineers and scientists in many disciplines for which modeling and simulation and the methods to assess accuracy of their results are important.

Scope: Areas of interest including, but not limited to: Code verification; Solution verification; Validation; Uncertainty quantification; Model prediction; Model adequacy; Model accuracy; Predictive capacity; Model maturity; Phenomena identification and ranking table (PIRT); Design of experiments; Experimental uncertainty; Uncertainty in measurement; Model uncertainty; Model discrepancy; Sensitivity analysis; Model fidelity; Intended use; Context of use; Regulatory science; Aleatoric uncertainty; Epistemic uncertainty; Comparator; Quantification of margins and uncertainties (QMU); Fundamentals of probability; Applications of probability; Bayesian inference; V&V standards development; Challenge problems; Model calibration methods; Uncertainty propagation; Application examples of VVUQ.

Journal of Vibration and Acoustics

Editor-in-Chief: Christopher D. Rahn, The Pennsylvania State University, USA

The *Journal of Vibration and Acoustics* is sponsored jointly by the Design Engineering and the Noise Control and Acoustics Divisions of ASME. The journal is the premier international venue for publication of original research concerning mechanical vibration and sound. Our mission is to serve researchers and practitioners who seek cutting-edge theories and computational and experimental methods that advance these fields. Published studies reveal how mechanical vibration and sound impact the design and performance of engineered devices and structures and how to control their negative influences.

Scope: Vibration of continuous and discrete dynamical systems; Linear and nonlinear vibrations; Random vibrations; Wave propagation; Modal analysis; Mechanical signature analysis; Structural dynamics and control; Vibration energy harvesting; Vibration suppression; Vibration isolation; Passive and active damping; Machinery dynamics; Rotor dynamics; Dynamics of MEMS/NEMS; Dynamics and acoustics of metamaterials; Bio-inspired dynamical and acoustical systems; Vehicle dynamics; Smart structures and materials; Acoustic emission; Noise control; Machinery noise; Structural acoustics; Fluid-structure interaction; Aeroelasticity; Flow-induced vibration and noise; Underwater acoustics.

MECHANICAL ENGINEERING MAGAZINE SELECT ARTICLES

Mechanical Engineering Magazine Select Articles

Mechanical Engineering® magazine is the award-winning flagship publication of ASME. Published since 1880, the magazine delivers an interdisciplinary view into engineering trends and breakthroughs, giving readers a roadmap to better understand today's technology and tomorrow's innovations. Feature articles published in this magazine range in time from 1998 - present and are available on the The ASME Digital Collection as *Mechanical Engineering Magazine Select Articles*.

eISSN: 1943-5649

asmedigitalcollection.asme.org/memagazineselect

This online only publication is an add-on subscription product and is not included in the standard product packages

ASME CONFERENCE PROCEEDINGS

Every year, more than 20,000 authors from across all continents share their research with colleagues throughout the world by presenting papers at ASME conferences. The demand to publish new research is such that it has raised the status of conferences as the first venue for presentation and subsequent publication.

Taking this into account, **ASME's primary commitment is to maintain the *integrity* and *quality* of conference proceedings publishing** for which it has become known.

Annually, ASME sponsors more than 30 conferences globally and publishes approximately 100 peer-reviewed proceedings volumes per year.

The ASME Digital Collection offers the **complete compendium** of available Conference Proceedings published from **2000 — present, plus select proceedings back to 1955. Content also includes Standards conferences.**

DID YOU KNOW?

ASME Conference Proceedings comprise:

- More than **2,000** volumes
- More than **150,000** papers
- More than **1,200,000** pages

A subscription to the ASME Current Conference Proceedings package provides **unlimited access to all papers published from 2008 through the current year.**

Complete your ASME Conference Proceedings content by adding the Archive (2007 and prior). This extends your subscribed content by adding the best mechanical engineering content available on the web. Additional legacy content (2000 and earlier) is included in the Archive starting in 2021.

ASME Conference Proceedings are submitted for indexing to leading A&I discovery services including CrossRef, Web of Science, Conference Proceedings Citation Index, Compendex, Scopus, and many others.

The ASME Conference Proceedings are also available in print.

For more information about ASME Conference Proceedings on The ASME Digital Collection, visit asmedigitalcollection.asme.org/proceedings

MULTIDISCIPLINARY

International Mechanical Engineering Congress and Exposition (IMECE)

Proceedings of IMECE cover cutting-edge engineering research and applications in all mechanical engineering disciplines including aerospace, manufacturing, biomedical and biotechnology, dynamics and control, energy, fluids engineering, heat

transfer, mechanics of solids, structures, fluids, acoustics, micro- and nanosystems, transportation, and emerging technologies.

(Content from 2002 to current year as becomes available)

AJK Joint Fluids Engineering (AJKFLUIDS)

Proceedings of this global collaboration in advanced fluids engineering address areas of convergence of fluid dynamics and mechanical engineering including the scientific method of exploration and generation of petroleum and natural gas, innovative mechanical and chemical processes for production of non-organic fluid material in production units, and comprehensive evaluation of diverse aspects of fluid mechanics such as multiphase fluid flows, liquid-solid flows, measurement methods of fluids, and instruments and tools used for analysis of fluid behavior.

(Content for 2011, 2015, and 2019)

ASME/JSME Thermal Engineering Joint Conference (AJTEC)

Content of this AJTEC Conference focuses on efforts to integrate thermal engineering with other disciplines and to broaden perspective to include a broad range of time scales (from ultra-rapid to long term) and length scales (from nanoscale to global).

(Content for 2011)

Fluids Engineering Division Summer Meeting (FEDSM)

Proceedings of the FEDSM Conferences feature technical papers on topics in fluid mechanics including pumping machinery, liquid-solid flows, and environmental applications.

(Content from 2002 to current year as becomes available)

Heat Transfer Summer Conference (SHTC)

Proceedings cover cutting-edge research in thermal science and engineering and related areas such as heat transfer in energy systems, aerospace heat transfer, gas turbine heat transfer, and others.

(Content from 2003-2005, 2007-2009, 2012-2013, 2016-2017, and 2019)

International Heat Transfer (IHTC)

Proceedings content ranges from fundamentals of thermal phenomena and traditional thermal applications to the emerging domains of thermal transport in nanomaterials, biosystems, power generation, MEMS, microsystems, information systems, energy conversion devices, aerospace, and hostile environment systems.

(Content for 2010)

International Joint Tribology Conference (IJTC)

Proceedings of the IJTC Conferences cover topics such as nanotribology, biotribology, engineered surfaces, boundary lubrication, fluid film lubrication, machine components tribology, and contact mechanics.

(Content from 2002-2012/excludes 2005)

Water Quality, Drought, Human Health and Engineering Conference (WATER)

Proceedings from this WATER Conference cover the latest information regarding plans for improving the quantity and quality of water, the impact on human health and engineering, and current regulation and policies.

(Content for 2006)

World Tribology Congress (WTC)

Focused on nanotribology and its role in the fast-growing area of nanotechnology, papers from the WTC Conference cover related technologies such as tribochemistry, additives, materials, surface engineering, and aerospace.

(Content for 2005)

BIOMEDICAL AND BIOTECHNOLOGY

ASME Conference on Frontiers in Medical Devices: Applications of Computer Modeling and Simulation (FMD)

Proceedings cover computational modeling, imaging and simulation, novel computational methods, and patient-specific modeling.

(Content for 2013)

Design of Medical Devices Conference (DMD)***

The DMD Conference brings together medical device designers, manufacturers, researchers, and representatives from academia and the public sector.

(Content from 2017 to current year as becomes available)

Frontiers in Biomedical Devices (BIOMED)

Proceedings of the BIOMED Conferences cover the latest developments in biomedical devices and clinical practices in the areas of cardiovascular, orthopedics, and advanced technology.

(Content from 2006-2011)

Global Congress on NanoEngineering for Medicine and Biology (NEMB)

NEMB Proceedings focus on the integration of engineering sciences, mechanical engineering, and nanotechnology to address problems in biology and medicine in order to develop devices for the early detection and cure of diseases.

(Content for 2010 and 2013)

Summer Bioengineering Conference (SBC)

Focused on cutting-edge research in the fields of biomechanics, design, and rehabilitation, the proceedings feature papers on biotransport, human dynamics, fluids, tissue engineering, and other solid mechanics topics.

(Content from 2007-2013)

DESIGN

ASME Citrus Engineering Symposium (CES)***

This symposium focuses on current-day technical issues that strengthen the industry and promote the continuing improvement of citrus products.

(Content from 1955-2010, 2012, and 2014)

ASME/IEEE Joint Rail Conference (JRC)

Encompassing all aspects of rail transportation and engineering research, proceedings of the JRC cover topics that include railroad infrastructure engineering, rail equipment engineering, and planning and development.

(Content from 2006 to current year as becomes available)

Dynamic Systems and Control Conference (DSCC)

Conference Proceedings of the DSCC concentrate on control methods and devices – from servomechanisms and regulators to automatic controls – for dynamic systems involving forces, motion, and/or the flow of energy or materials.

(Content from 2008 to current year as becomes available)

Engineering Systems Design and Analysis (ESDA)

Focused on engineering and related disciplines, ESDA Conference Proceedings feature technical papers ranging from theoretical developments through to industrial applications and case studies.

(Content from 2004-2014/biennial)

Fluid Power and Motion Control (FPMC)

Proceedings from the FPMC Conferences focus on advances in the design and analysis of fluid power components, such as hydraulic and pneumatic actuators, pumps, motors, and modulating components, in various systems and applications.

(Content from 2013 to current year as becomes available)

Fluid Power Net International Symposium (FPNI)

The FPNI Symposium provides a forum for scientists from all over the world, from both academia and industry, to exchange ideas and opinions on current research and future developments in fluid power technology.

(Content for 2014 and 2016)

Fluid Power Systems Technology (FPST)

Proceedings from this FPMC Conference focus on advances in the design and analysis of fluid power components, such as hydraulic and pneumatic actuators, pumps, motors and modulating components, in various systems and applications.

(Content from 2013 to current year as becomes available)

IEEE/ASME International Conference on Advanced Intelligent Mechatronics (AIM)

Proceedings of the AIM conference highlights advanced intelligent mechatronics systems expecting their promising contribution to our society

(Content for 2022)

Information Storage and Processing Systems (ISPS)

Papers presented cover interdisciplinary research and application topics related to information storage and processing systems.

(Content from 2013-2014 and 2016-2019)

International Design Engineering Technical Conferences & Computers and Information in Engineering Conference (IDETC/CIE)

Proceedings of the IDETC/CIE Conferences feature cutting-edge research and accomplishments related to design concepts of machining, reliability, and manufacturability, and the application of computer simulation to the engineering process.

(Content from 2002 to current year as becomes available)

Noise Control and Acoustics Division Conference (NCAD)

These proceedings highlight the latest research in this emerging field.

(Content for 2008, 2012, 2015, and 2018)

Rail Transportation Division Conference (RTD)

Focused on the current state and challenges of the rail transportation industry, papers from this conference cover topics such as track and equipment health monitoring, advanced risk reduction data analysis, and more.

(Content from 2003 and 2007-2013)

Verification and Validation Symposium (VVS)***

This unique event brings together engineers and scientists from a wide array of disciplines that practice verification, validation, and uncertainty quantification (VVUQ) in their computational modeling and simulation. Papers discuss ideas and methods from leading experts for verification of codes and solutions, simulation validation, and assessment of uncertainties in mathematical models, computational solutions, and experimental data.

(Content from 2018 to current year as becomes available)

World Conference on Innovative Virtual Reality (WINVR)

Proceedings of the WINVR Conferences focus on the current challenges in the use of VR to solve industrial problems, barriers to developing VR, cost-benefit analysis, and future trends.

(Content from 2009-2011)

MANUFACTURING AND MATERIALS

Annual Review of Progress in Quantitative Nondestructive Evaluation (QNDE)

Current ideas and results in nondestructive evaluation (NDE) are focused on facilitating a rapid transfer to engineering development.

(Content for 2021)

ASME Aerospace Structures, Structural Dynamics, and Materials Conference (SSDM)

Gathers aerospace structures, structural dynamics, and materials engineers and researchers from industry, academia, and government agencies to discuss technical advancements in this growing sector.

(Content from 2023 to current year as becomes available)

Hypervelocity Impact Symposium (HVIS)***

Proceedings of the HVIS Conference highlight the latest advancements in the basic understanding of hypervelocity impact physics, related phenomenology, and engineering applications. [\(Content for 2019\)](#)

International Additive Manufacturing Conference (I-AM)

Proceedings of I-AM focused on cutting-edge technology in additive manufacturing R&D. [\(Content for 2022\)](#)

International Manufacturing Science and Engineering Conference (MSEC)

Proceedings of the MSEC Conferences highlight cutting-edge manufacturing research in materials, processing, properties, applications and systems, and micro- and nanotechnologies. [\(Content from 2006 to current year as becomes available\)](#)

International Symposium on Flexible Automation (ISFA)

Proceedings cover topics in advanced manufacturing automation technologies essential to meeting industry's needs in flexibility, intelligence, lead-time reduction, lean manufacturing in emerging areas such as nanomanufacturing, biomanufacturing, energy manufacturing, sustainable design and manufacturing, automotive and consumer electronics, information technology, biomedical technology, aerospace and transportation systems, and renewable energy systems, etc. [\(Content for 2012\)](#)

JSME 2020 Conference on Leading Edge Manufacturing/Materials and Processing (LEMP)

LEMP aims to provide an atmosphere for researchers and engineers to discuss, exchange, and expose ideas, methods and results in conventional, contemporary, and future topics related to a wide variety of manufacturing technologies. [\(Content for 2020\)](#)

Multifunctional Nanocomposites and Nanomaterials International Conference (MN)

Focused on highlighting the importance of nanotechnology applications in mechanical engineering, the proceedings from this conference cover topics such as fabrication, design, and modeling of nanocomposites and nanomaterials. [\(Content for 2006 and 2008\)](#)

Smart Materials, Adaptive Structures and Intelligent Systems (SMASIS)

Proceedings of the SMASIS Conferences highlight the latest in smart materials, the cutting edge in adaptive structure applications, and the recent advances in device technologies. [\(Content from 2008 to current year as becomes available\)](#)

MICROTECHNOLOGY AND NANOTECHNOLOGY

CANEUS: MNT for Aerospace Applications (CANEUS)

Focused on micro-nanotechnology (MNT) development for aerospace applications, the proceedings feature emerging MNT concepts, MNT system development, and end user needs and perspectives. [\(Content for 2006\)](#)

Energy Nanotechnology International Conference (ENIC)

Papers from the ENIC Conferences cover state-of-the-art research and development in energy-related materials, nanoscale phenomena, devices, systems, manufacturing, and commercialization. [\(Content for 2007 and 2008\)](#)

Integrated Nanosystems: Design, Synthesis, and Applications (NANO)

Aimed at furthering the development of nanotechnology, proceedings of the NANO Conference focus on the state of the art in devices and systems, nanoscale phenomena, and nanomanufacturing. [\(Content for 2004 and 2005\)](#)

International Conference on Integration and Commercialization of Micro- and Nanosystems (MNC)

Papers from the MNC Conferences focus on state-of-the-art R&D in micro- and nanoscale phenomena, devices, systems, manufacturing, as well as on the commercialization of micro-and nanotechnologies. [\(Content for 2007 and 2008\)](#)

International Conference on Micro/Nanoscale Heat Transfer (MNHT)

Focused on state-of-the-art R&D in micro/nanoscale heat transfer, proceedings of MNHT cover topics such as micro/nanofluidics, nanofluids, biomicrofluidics, boiling, and evaporation heat transfer. [\(Content from 2008-2009, 2012-2013, 2016, and 2019\)](#)

International Conference on Nanochannels, Microchannels, and Minichannels (ICNMM)

Technical papers presented at the ICNMM Conferences are focused on identifying research needs in nanochannels encompassing engineering, MEMS, microfluidics, biomedicine, and many other frontier research disciplines. [\(Content from 2003 to current year as becomes available\)](#)

International Electronic Packaging Technical Conference and Exhibition (InterPACK)

Focused on R&D, manufacturing, and application for packaging and integration of electronic and photonic systems, MEMS, and NEMS, the proceedings cover the latest research and emerging technologies. [\(Content from 2003 to current year as becomes available/biennial\)](#)

NUCLEAR

High Temperature Reactor Technology (HTR)

Proceedings of the HTR Conference are focused on identifying essential requirements needed to manage the implementation of HTR technology and discover uses of HTR beyond nuclear power.

(Content for 2008)

International Conference on Nuclear Engineering (ICONE)

Proceedings of this global conference address the needs of the nuclear industry and cover the latest nuclear technology applications and innovations.

(Content for 2002, 2004, 2006, 2008-2010, 2012-2014, and 2016-2018, and 2020)

International Conference on Radioactive Waste Management and Environmental Remediation (ICEM)

Papers from the ICEM Conferences focus on technologies, operations, management approaches, economics, and public policies in the areas of environmental remediation and radioactive waste management.

(Content for 2003, 2007, 2009-2011, and 2013)

Nuclear Forum (NUCLRF)

Nuclear Forum technical papers cover the most recent developments in the nuclear power industry comprising plants, operations, safety and security, materials and structures, modeling and simulations, advanced reactor concepts, thermal hydraulics and computational fluid dynamics, materials, structures, and components.

(Content for 2015, 2017, and 2018)

Small Modular Reactors Symposium (SMR)

Proceedings topics address the technical, business, and regulatory issues for the deployment of small modular reactors, including technical details for bringing SMRs from design concept into fabrication and building.

(Content for 2011 and 2014)

POWER AND ENERGY

ANES/ASME Joint National Solar Energy Week (ANES/ASME)

Compilation of papers reflecting work in renewable technologies in 2006.

(Content for 2006)

Asset Integrity Management-Ageing and Life Extension Conference (AIM-ALE)

These Proceedings address (a) management systems for a wide range of offshore components and structures and (b) relevant technologies, including emerging technologies for the measurement of damage levels, analytical tools to quantify degradation with a focus on probabilistic developments, and case histories and definition of the way forward to develop recommended practices and standards.

(Content for 2021. For the 2019 AIM-PIMG, please see ASME eBooks.)

Energy Sustainability (ES)

Broad coverage of energy engineering technologies encompassing alternative energy, composite materials, offshore technology, plant engineering, structural dynamics, and more is featured.

(Content from 2007 to current year as becomes available)

Engineering Technology Conference on Energy (ETCE)

Broad coverage of energy engineering technologies encompassing alternative energy, composite materials, offshore technology, plant engineering, structural dynamics, and more is featured.

(Content for 2002)

Gas Turbine India Conference (GTINDIA)

Authors and presenters participate in this event to exchange ideas on research, development, and best practices on gas turbines and allied areas. Authors and presenters include the industry's leading professionals and key decision makers, whose innovation and expertise are shaping the future of turbomachinery.

(Content from 2012-2015, 2017/biennial as becomes available)

Internal Combustion Engine Division Fall Technical Conference (ICEF)

Covering topics related to internal combustion engines such as engine design and lubrication, ICEF brings together members of industry, government, and academia to discuss the latest in the field.

(Content from 2002-2007 and 2009 to current year as becomes available)

Internal Combustion Engine Division Spring Technical Conference (ICES)

Proceedings of the ICES Conferences feature technical papers focused on the design, development, and application of compression-ignition, spark ignition, rotary, and reciprocating engines.

(Content from 2002-2003, 2005-2009, and 2012)

International Conference on Fluidized Bed Combustion (FBC)

Proceedings papers feature cutting-edge research in fluidized bed combustion technology developments and their applications and cover topics such as sustainable fuels, operations, and the environment.

(Content for 2003 and 2005)

International Conference on Fuel Cell Science, Engineering and Technology (FUELCELL)

Technical papers presented at the FUELCELL Conferences cover topics in solar and other renewable energy, fuel cells, and advanced energy technologies.

(Content from 2003 to 2017/excludes 2007)

International Conference on Offshore Mechanics and Arctic Engineering (OMAE)

Proceedings of the OMAE Conferences feature topics in offshore technology, structures, safety and reliability, materials technology, pipeline and riser technology, and ocean space utilization.

(Content from 2002 to current year as becomes available)

Onshore Petroleum Technology Conference (OPTC)

Aims to help professionals in the onshore oil and gas value chain obtain access to cutting edge technical knowledge, and insights. Facilitates the learning and discussion of important issues to improve safety, reliability, and the environment and performance of stakeholders.

(Content from 2021 to current year as becomes available)

International Joint Power Generation Conference (IJPGC)

Proceedings topics include components, plants and design engineering, operations, maintenance and reliability, combined cycles, turbines and generators, fuels, combustion and emissions, and advanced energy systems.

(Content for 2002 and 2003)

International Offshore Wind Technical Conference (IOWTC)

Papers presented at this conference draw from members of the scientific community, researchers, academia, and the offshore wind engineering industry from around the world. Organized around scientific and project development tracks, topics cover fixed and floating offshore concepts, mooring and foundations, turbines modeling, and more.

(Content from 2018 to current year as becomes available)

International Solar Energy Conference (ISEC)

Technical papers from the ISEC Conferences cover research results, new developments, and novel thermal and mechanical concepts in the area of solar and renewable energy technologies.

(Content from 2002-2006)

Marine Technology and Standards (MTS)***

Topics range from technological impact on the marine industry to corresponding coverage in related Codes and Standards and government regulations.

(Content for 2010, 2013, and 2017)

North American Waste-to-Energy Conference (NAWTEC)

Papers from the NAWTEC Conferences cover topics related to municipal waste-to-energy, combustion engineering science, and emerging waste conversion and processing technologies.

(Content from 2002-2013)

Power Conference (POWER)

Focused on the latest technologies to improve how power plants operate, the proceedings cover topics including fuels, steam generators, heat exchangers, turbines, and plant operations and maintenance.

(Content from 2004 to current year as becomes available)

Turbine Blade Tip Symposium (TBTS)

Multidisciplinary content from this conference addresses the current state of the art in the design, analysis, and improvement of turbine blade tips. A major area of focus is the issue of blade tip burnout. Current proposals on enacted solutions are presented along with studies and industry input that provide insight into physics challenges.

(Content for 2013)

Turbo Expo (GT)

Turbo Expo Proceedings papers cover the latest in the design, manufacture, and operation of gas turbine and aeroengine machinery in various applications in aircraft, marine, and electric power generation.

(Content from 1956 to current year as becomes available)

Wind Energy Symposium (WIND)

These proceedings focus on wind turbine aerodynamics, materials and manufacturing, load and fatigue analysis, controls and structural analysis, and inflow, acoustic noise, and power.

(Content for 2002 and 2003)

PRESSURE TECHNOLOGY

ASME Asia Pacific Pipeline Conference (APPC)

Proceedings of this conference, organized by ASME and the China University of Petroleum, focus on the development of the pipeline industry around the world and highlight technological innovation in the design, safety, maintenance, and management of oil and gas pipelines.

(Content for 2019)

ASME India Oil and Gas Pipeline Conference (IOGPC)

IOGPC Proceedings present research results, new developments, and encourage new initiatives in the oil and gas industry in India. Areas of impact include design and construction, pipeline materials, integrity management, health, safety, and environment.

(Content from 2013 to current year as becomes available/biennial)

ASME International Pipeline Geotechnical Conference (IPG)

The IPG Conference is an international event to promote knowledge sharing, technological progress, and international cooperation for advancing the management of natural forces impacting pipelines with the intent of protecting the public, environment, energy infrastructure assets and ensure safe and reliable operations.

(Content for 2013, 2015, 2017, and 2019/biennial)

ASME/NRC Pump and Valve Symposium (PVS)***

PVS presents comprehensive coverage of the latest issues, technology developments, and research in the preservice and in-service testing of nuclear power plants and components and how these developments are being considered by the ASME/NRC O&M Code Committees.

(Content for 2014, 2017, 2022)

ASME Symposium on Elevated Temperature Application of Materials for Fossil, Nuclear, and Petrochemical Industries (ETAM)***

Presentations focus on the design, fabrication, and construction practices of pressure equipment such as boilers, pressure vessels, and piping components that will operate at elevated temperatures where materials are subject to creep, creep-fatigue, embrittlement, and environmental effects.

(Content for 2014 and 2018)

International Pipeline Conference (IPC)

Papers from the IPC Conferences cover topics in production pipelines, design and construction, database development, facilities integrity management, operations, and maintenance.

(Content from 1996 to current year as becomes available/biennial)

Pressure Vessels and Piping Conference (PVP)

Proceedings of the PVP Conferences cover topics such as Codes and Standards and design and analysis related to pressure vessel and piping technologies for the power and process industries.

(Content from 2002 to current year as becomes available)

***PUBLIC ACCESS CONFERENCE PROCEEDINGS

ASME EBOOKS

ASME publishes high-quality professional and reference works, handbooks, as well as advanced monographs in established and emerging areas of interest to mechanical engineers and allied disciplines.

The ASME eBook collection offers over 275 recent and classic eBooks, with selected titles going back to 1944.

- Featured eBook Subject Categories include:**
- BioNano Series
 - Design & Manufacturing
 - Emerging Technologies
 - Energy and Power
 - Engineering Management
 - Heat Transfer and Electronic Packaging
 - Pipeline Engineering
 - Pressure Vessels and Piping
 - Risk and Remediation
 - Robotics
 - Tribology

For more information about ASME eBooks on The ASME Digital Collection, visit asmedigitalcollection.asme.org/ebooks

FEATURED EBOOK

Online Companion Guide to the ASME Boiler and Pressure Vessel Codes: Criteria and Commentary on Select Aspects of the Boiler & Pressure Vessel Codes

This new, **online, eBook edition** of the *Companion Guide to the ASME Boiler and Pressure Vessel Codes* is available only by subscription and will provide selected chapters updated annually as available for the latest release of the ASME BPV Standard. Up to 20 updated chapters (out of 40 total chapters) are expected each year, which will be available to online subscribers only.

In addition, each of the updated chapters now have new, professional abstracts, and full-text searching across all chapters, which were not available in previous electronic editions.

Printed hardcopies of the Companion Guide, Sixth Edition, Volumes 1 and 2, published in 2023, are available for purchase on asme.org.

e-ISBN: 9780791861981

<https://doi.org/10.1115/1.861981>

This eBook is an add-on subscription product and is not included in the standard eBook packages

MORE ASME EBOOKS

2023

Case Studies in Transient Heat Transfer With Sensitivities to Governing Variables

Every heat transfer problem has to satisfy the first law of thermodynamics, namely the law of conservation of energy. Before steady-state conditions are reached, every heat transfer problem is in an unsteady state and energies in a control volume and energies coming in and out of a control volume can change with time. These time dependent energy conservation in a control volume refers to a fascinating and challenging part of heat transfer called the unsteady state or transient heat transfer. This book deals with twenty-four transient heat transfer problems in our everyday lives.

ISBN: 9780791886786

FEATURED TITLE

Companion Guide to the ASME Boiler & Pressure Vessel Codes, Volume 1, Sixth Edition

This updated and revised Vol. 1 sixth edition of this classic reference work is current to the latest ASME BPV Code release. It is available in a convenient two-volume format that focuses on all twelve sections of the ASME Code, as well as relevant piping codes.

Several chapters have new authors and are entirely new, while others have been extensively re-written for this edition.

ISBN: 9780791886519

Companion Guide to the ASME Boiler & Pressure Vessel Codes, Volume 2, Sixth Edition

This updated and revised Vol. 2 sixth edition of this classic reference work is current to the latest ASME BPV Code release. It is available in a convenient two-volume format that focuses on all twelve sections of the ASME Code, as well as relevant piping codes. Several chapters have new authors and are entirely new, while others have been extensively re-written for this edition.

ISBN: 9780791886526

2022

Analysis of ASME Boiler, Pressure Vessel, and Nuclear Components in the Creep Range

Many structures in chemical plants, refineries, and power generation plants operate at elevated temperatures where creep and rupture are a design consideration. At such elevated temperatures, the material tends to undergo gradual strain with time, which could eventually lead to failure. Thus, the design of such components must take into consideration the creep and rupture of the material. *Analysis of ASME Boiler, Pressure Vessel, and Nuclear Components in the Creep Range* introduces the general principles of design at elevated temperatures with extensive references cited for further in-depth understanding of the subject.

ISBN: 9781119679462

Consensus on Operating Practices for the Control of Feedwater and Boiler Water Chemistry in Industrial and Institutional Boilers

The Water Technology Subcommittee of the ASME Research and Technology Committee on Water and Steam in Thermal Systems has revised the *Consensus on Operating Practices for the Control of Feedwater Boiler Water Chemistry in Modern Industrial Boilers*. This current document is an expansion and revision of the original, with reordered and modified texts.

ISBN: 9780791885093

Engineering Practice with Oilfield and Drilling Applications

This book explains how to apply time-tested engineering design methods when developing equipment and systems for oil industry and drilling applications. Although specific requirements and considerations must be incorporated into an engineering design for petroleum drilling and production, the approach for developing a successful solution is the same across many engineering disciplines. *Engineering Practice with Oilfield and Drilling Applications* helps readers understand the engineering design process while demonstrating how basic engineering tools can be applied to meet the needs of the oil and petroleum industry.

ISBN: 9781119799498

FEATURED TITLE

Fabrication of Metallic Pressure Vessels

Fabrication of Metallic Pressure Vessels delivers comprehensive coverage of the various processes used in the fabrication of process equipment. The authors, both accomplished engineers, offer readers a broad understanding of the steps and processes required to fabricate pressure

vessels, including cutting, forming, welding, machining, and testing, as well as suggestions for controlling costs.

ISBN: 978111967486543

Flow-Induced Vibration Handbook for Nuclear and Process Equipment

Excessive flow-induced vibration causing failures by fatigue or fretting wear must be avoided in process and nuclear components. That is the purpose of this handbook. It helps engineers design, operate, and diagnose heat transfer equipment. The emphasis is on two-phase flow-induced vibration.

ISBN: 9781119810964

FEATURED TITLE

Metrology and Instrumentation: Practical Applications for Engineering and Manufacturing

This book provides students and professionals with an accessible foundation in the metrology techniques, instruments, and governing standards used in mechanical engineering and manufacturing. The book opens with an overview of metrology units and scale, then moves on to explain

topics such as sources of error, calibration systems, uncertainty, and dimensional, mechanical, and thermodynamic measurement systems.

ISBN: 9781119721734

Robust Control: Youla Parameterization Approach

Discover efficient methods for designing robust control systems. This title demonstrates that feedback control can be elegantly designed in the frequency domain using the Youla parameterization approach. It offers deep insights into the many practical applications from utilizing this technique in both Single Input Single Output (SISO) and Multiple Input Multiple Output (MIMO) design. Finally, the book provides an estimation technique using Youla parameterization and controller output observer for the first time. Perfect for industrial researchers and engineers working with control systems, *Robust Control: Youla Parameterization Approach* is also an indispensable resource for graduate students in mechanical, aerospace, electrical, and chemical engineering.

ISBN: 9781119500360

Additional titles will be added to the 2022 eBooks package as they become available

2021

Advanced Multifunctional Lightweight Aerostructures

This review of the newest methodologies for the characterization and modelling of lightweight materials and structures offers in-depth analyses of the thermal, electrical, and mechanical responses of multi-functional lightweight structures.

ISBN: 9781119756712

Advances in Computers and Information in Engineering Research, Volume 2

This is the second volume in this book series that aims to capture advances in computers and information in engineering research, especially by researchers and members of ASME's Computers & Information in Engineering (CIE) Division. The series focuses on advances in computational methods, algorithms, tools, and processes on the cutting edge of research and development as they have evolved and/or have been reported during the last three to five annual CIE conferences.

ISBN: 9780791862025

Bearing Dynamic Coefficients in Rotordynamics

The revised and updated 2021 edition, *Bearing Dynamic Coefficients in Rotordynamics*, delivers an authoritative guide to the fundamentals of bearing and bearing dynamic coefficients containing various computation methods. Three of the most popular and state-of-the-art methods of determining coefficients are discussed in detail. The computation methods covered include an experimental linear method created by the author and numerical linear and nonlinear methods using the finite element method.

ISBN: 9781119759263

Biomass & Waste Energy Applications

This second volume of the ASME Press Book Series on Renewable Energy is based on updated chapters from the classic 2011 *Handbook of Energy and Power Generation* plus new chapters. Nine experts from academia and practicing professionals from the U.S. and India cover varied aspects of biomass and waste energy in use

around the globe. They highlight current usage and the potential of untapped resources. A comprehensive Index helps users easily navigate through the text and graphics.

ISBN: 9780791883679

Chronicles of Mechanical Engineering in the United States

Issued in commemoration of the 50th anniversary of ASME's history and heritage committee, this new book collects, in a single place, historical contributions published over the past 50 years in ASME's flagship magazine *Mechanical Engineering*.

ISBN: 9780791884843

Electromagnetic Waves and Heat Transfer: Sensitivities to Governing Variables in Everyday Life

Electromagnetic waves are studied in almost every scientific field from astronomy, agriculture, chemistry, medicine to physics. This book focuses on heat transfer aspects of electromagnetic waves. Twenty-

four chapters provide solutions to heat transfer problems from electromagnetic waves' radiation energy, with different uses and cases related to our lives. Each problem solution also investigates the sensitivity of critical independent variables to governing dependent variables.

ISBN: 9780791883648

Fundamentals of CANDU Reactor Physics

With more than 75 years of combined working experience in the area of reactor physics and safety, the intention of the authors of this monograph is to provide a practical book on reactor physics, particularly for the safe operation of aged CANDU reactors, with minimal mathematics or equations. This book is ideal as a reference for physicists, operators, regulatory staff, and for those who need to interact with reactor physicists at CANDU sites, nuclear laboratories, institutes, universities, or engineering companies.

ISBN: 9780791884836

FEATURED TITLE
Process Piping: The Complete Guide to the ASME B31.3, Fourth Edition

Fully updated for the 2020 Edition of the ASME B31.3 Code, this fourth edition provides background information, historical perspective, and expert commentary on the ASME B31.3 Code requirements for process piping design and construction.

It provides the most complete coverage of the Code that is available today and is packed with additional information useful to those responsible for the design and mechanical integrity of process piping.
ISBN: 9780791884829

Steam Jet Ejectors for the Process Industries

This, the first comprehensive review of steam jet ejector technology, presents a wide range of methods for achieving maximum performance. The book fully explains how different ejectors are installed, how they operate, and how they are tested and maintained. The basic theories and practical information presented using a minimum of engineering jargon, will give chemical and mechanical engineers as well as technicians the answers to their questions about how to achieve maximum performance in utilizing steam jet refrigeration, gas jet compressors, and the various utility ejectors that use water, air, steam, or other fluids for pumping, conveying and mixing tasks.

ISBN: 97807918884614

Technical Writing A-Z: A Commonsense Guide to Engineering Reports and Theses, Second Edition (British English Edition)

This second edition has been revised and updated. Not intended to be read from cover to cover, this book was designed instead to be a quick and useful reference for students, early career engineers, and experienced professionals alike. It provides guidelines, advice, and technical information for preparing formal documents--covering a range of report formats (e.g., assessment, laboratory, and progress reports). This concise, no-nonsense guide provides alphabetically ordered and cross-referenced topics, which make it easy to find answers to questions related to writing a technical report or thesis.

ISBN: 97807918884614

Technical Writing A-Z, A Commonsense Guide to Engineering Reports and Theses, Second Edition (U.S. Edition)

This second edition has been revised and updated. Not intended to be read from cover to cover, this book was designed instead to be a quick and useful reference for students, early career engineers, and experienced professionals alike. It provides guidelines, advice, and technical information for preparing formal documents--covering a range of report formats (e.g., assessment, laboratory, and progress reports). This concise, no-nonsense guide provides alphabetically ordered and cross-referenced topics, which make it easy to find answers to questions related to writing a technical report or thesis.

ISBN: 9780791884621

Turbo/Supercharger Compressors and Turbines for Aircraft Propulsion in WWII

This book is a unique blend of history, technology review, theoretical fundamentals, and design guide. The subject matter is primarily piston aeroengine superchargers - developed in Germany during the Second World War (WWII) - which are centrifugal compressors driven either by the main engine crankshaft or by an exhaust gas turbine. The core of the book is an unpublished manuscript by Karl Kollmann, who was a prominent engineer at Daimler-Benz before and during the war.

ISBN: 9780791884676

Two-Phase Heat Transfer

This book is primarily intended for design and development engineers. The emphasis of this book is therefore on information which is of practical use. For this reason, theories and methods that do not provide usable solutions are covered briefly, although sufficient references are provided for more information. Effort is made to provide the best available information for the design of heat exchangers in a clear and concise manner. This information includes experimental data, theoretical solutions, and empirical correlations.

ISBN: 9781119618614

Vibration Assisted Machining: Theory, Modelling and Applications

The first book to comprehensively address the theory, kinematic modelling, numerical simulation, and applications of vibration assisted machining. This book covers all key aspects of vibration assisted machining, including cutting kinematics and dynamics, the effect of workpiece materials, and wear of cutting tools. It also addresses practical applications for these techniques. Case studies provide detailed guidance on the design, modeling, and testing of VAM systems. Experimental machining methods are also included, alongside considerations of state-of-the-art research developments on cutting force modeling and surface texture generation.

ISBN: 97801119506355

Vibrations of Linear Piezostructures

Vibrations of Linear Piezostructures is an introductory text that offers a concise examination of the general theory of vibrations of linear piezostructures. This important book brings together in one comprehensive volume the most current information on the theory for modeling and analysis of piezostructures. The authors explore the fundamental principles of piezostructures, review the relevant mathematics, continuum mechanics and elasticity, and continuum electrodynamics as they are applied to electromechanical piezostructures, and include the work that pertains to linear constitutive laws of piezoelectricity.

FEATURED TITLE

Computer Aided Design and Manufacturing

This book addresses the need to provide up-to-date coverage of current CAD/CAM usage and implementation. It covers, in one source, the entire design-to-manufacture process, reflecting the industry trend to further integrate CAD and CAM into a single, unified process. It also updates the computer aided design theory and methods

in modern manufacturing systems and examines the most advanced computer aided tools used in digital manufacturing.

ISBN: 9781119534211

Computer Vision for Structural Dynamics and Health Monitoring

This book provides comprehensive coverage of theory and hands-on implementation of computer vision-based sensors for structural health monitoring (SHM) and is the first to fill the gap between scientific research and its practical applications. It provides a complete, state-of-the-art review of the collective experience that the SHM community has gained in recent years. It also extensively explores the potentials of the vision sensor as a fast and cost-effective tool for solving SHM problems.

ISBN: 9781119566588

Design and Analysis of Centrifugal Compressors

This comprehensive overview of the theoretical fluid dynamic models describes the flow in centrifugal compressors and the modern techniques for the design of more efficient centrifugal compressors. The author, a noted expert in the field with over 40 years of experience, evaluates relevant numerical and analytical prediction models for centrifugal compressors with special attention to their accuracy and limitations. Relevant knowledge from the last century is linked with new insights.

ISBN: 9781119424093

Fundamentals of Heat Engines: Reciprocating and Gas Turbine Internal Combustion Engines

This book offers comprehensive coverage of heat engine cycles. From ideal (theoretical) cycles to practical and real cycles, it gradually increases in degree of complexity so that newcomers can learn and advance at a logical pace, and so instructors can tailor their courses toward each class level. To facilitate the transition from one type of cycle to another, it offers additional material covering fundamental engineering science principles in mechanics, fluid mechanics, thermodynamics, and thermochemistry.

ISBN: 9781119548768

Geometric Dimensioning and Tolerancing: Applications, Analysis, Gauging and Measurement [per ASME Y14.5-2018]

This textbook is for anyone whose work requires them to communicate, interpret, or manufacture products through the use of engineering drawings and/or CAD models that use Geometric Dimensioning and Tolerancing. Readers will learn the new ASME Y14.5-2018 standard on Dimensioning and Tolerancing, as well as the differences between that standard and prior revisions of Y14.5.

ISBN: 9780578470481

International Project Management for Technical Professionals, Second Edition

This book is intended as a practical tool rather than purely theoretical as one might find in many management books released today. Much of the book is based on practical experience, strategies and techniques attempted with various experience levels from interns and students

to managing Ph.D. level engineers and scientists.

ISBN: 9780791883563

Introduction to Plastics Engineering

This self-contained introduction to plastics engineering uses a unique synergistic approach to explore all aspects of material use — concepts, mechanics, materials, part design, part fabrication, and assembly — required for converting plastic materials, mainly in the form of small pellets, into useful products. Thermoplastics, thermosets, elastomers, and advanced composites, the four disparate application areas of polymers normally treated as separate subjects, are covered together.

ISBN: 9781119536574

Non-Proliferation Nuclear Forensics: Canadian Perspective

The authors provide an overview of Canada's nuclear forensics (NF) capability in addition to general aspects of nuclear forensics that are useful for both nuclear forensic practitioners and countries that are signatories to the Nuclear Non-Proliferation Treaty in establishing their NF capability. After summarizing challenges first responders face at crime scenes involving RN materials, they describe the RN materials from the uranium fuel cycle in Canada that are most relevant to NF.

ISBN: 9780791862032

Offshore Compliant Platforms: Analysis, Design, and Experimental Studies

This authoritative guide to the analysis and design of compliant offshore structures focuses on a new generation of platforms such as: triceratops, buoyant leg storage, and regasification platforms. The authors include basic information on the conceptual development of conventional platforms, as well as detailed descriptions of the design and development of new deep-water platforms. The book presents a detailed analysis of environmental loads inherent in offshore locations such as waves, wind, and current.

ISBN: 9781119669777

Pipeline Integrity Management Under Geohazard Conditions

Forty-two peer-refereed papers compile the results of extensive research as well as assemble pipeline operators' experiences in tackling geohazard challenges for both new and vintage pipelines. In addition to the experts' papers, the editors of the book prepared an introduction to each section that includes summary review of the different papers in the section. The papers are presented in 10 sections addressing all aspects of geohazard integrity management.

ISBN: 9780791861998

FEATURED TITLE

Solar Energy Applications

This first volume in the new ASME Press Book Series on Renewable Energy is based on updated chapters from the classic 2011 *Handbook of Energy and Power Generation*. The discussions cover varied aspects of solar energy in use around the globe. Chapters 1 through 6 deal with solar energy in over 200 pages addressed by 15

experts from academia, NASA, and practicing professionals from the U.S., Europe, China, and India.

ISBN: 9780791862001

Theory of Solid-Propellant Nonsteady Combustion

Summarizing theoretical approaches within the framework of the Zeldovich-Novozhilov (ZN-) theory, this book contains equations governing unsteady combustion and applies them systematically to a wide range of problems of practical interest. Theory conclusions are validated, as much as possible, against available experimental data. It provides an accurate up-to-date account and perspectives and is also accompanied by a website that hosts solutions to problems in the book.

ISBN: 9781119525707

Case Studies in Fluid Mechanics with Sensitivities to Governing Variables

This book covers the many issues that occur in practical fluid mechanics, heat transfer, and mass transfer and examines the basic laws (the conservation of matter, conservation of momentum, conservation of energy, and the second law of thermodynamics) of these areas. It offers problem solutions that start with simplifying engineering assumptions and then identifies the governing equations and dependent and independent variables.

ISBN: 9781119524786

Corrosion and Materials in Hydrocarbon Production: A Compendium of Operational and Engineering Aspects

This book captures the current understanding of corrosion processes in upstream operations and provides a brief overview of parameters and measures needed for optimum design of facilities. It focuses on internal corrosion occurring in hydrocarbon production environments and the key issues affecting its occurrence, including: the types and morphology of corrosion damage; principal metallic materials deployed; and mitigating measures to optimize its occurrence. The book looks toward the future of research and development to enable improved and economical design of facilities for oil and a gas production.

ISBN: 9781119515722

Dynamics of Particles and Rigid Bodies: A Self-Learning Approach

This unique approach to teaching particle and rigid body dynamics uses solved illustrative examples and exercises to encourage self-learning. The study of particle and rigid body dynamics is a fundamental part of curricula for students pursuing graduate degrees in areas involving dynamics and control of systems.

ISBN: 9781119463207

Electromagnetic Induction Imaging: Theory and Biomedical Applications

This 20th volume in our BioNano Monographs series offers comprehensive descriptions of recent investigations on the development and biomedical applications of electromagnetic (EM) induction imaging, which enables scientists and engineers to use EM imaging techniques to develop medical diagnostic and radiotherapy instruments.

ISBN: 9780791860465

Marketing of Engineering Consultancy Services: A Global Perspective

This is the latest volume in our Technical Manager's Survival Guides book series. As the global economy and society undergo a tectonic shift to a post-industrial information society with knowledge capital as its new resource, marketing of services is concurrently experiencing a paradigm shift. This book is a unique blend of the authors' decades of experience in the engineering consultancy service industry, combined with scholarly and academic excellence.

ISBN: 9780791861837

Mechanics of Accuracy in Engineering Design of Machines and Robots, Volume 2: Stiffness and Metrology

Volume 2 continues consideration of the accuracy-related problem as applied to machines and robots started in Volume 1. Two themes are: stiffness-compliance directly associated with the machine and robot accuracy through static deformations (Part 1) and computer-aided metrology aimed at final assessments of the accuracy-associated performance indexes (Part 2).

ISBN: 9780791861691

Oilwell Drilling Engineering

Fundamental elements of drilling provide the foundation for more detailed analyses throughout the book. Special features include comprehensive presentation of: 1) Drilling hydraulics; 2) Drillstring mechanics including vibration control; 3) Drilling economics; 4) Maintenance and reliability; and 5) Directional drilling including bit navigation, well path monitoring, and directional control. May be used as a university textbook or an industry reference.

ISBN: 9780791861875

Pipeline Geohazards: Planning, Design, Construction and Operations

This second edition of the 2008 ASME publication on the same topic is an expanded and updated treatment of a broader range of pipeline geohazard management aspects to serve the global community of pipeliners – both those with a geotechnical background as well as their colleagues in the multidisciplinary teams that deal practically with these issues.

ISBN: 9780791861790

Precision Programming of Roving Robots: Project-Based Fundamentals of Wheeled, Legged and Hybrid Mobile Robots

This book is designed primarily as a laboratory operations manual for fundamental mechatronics and robotics experiential and project-based learning.

The book is aimed at university and college

students; however, with robotics curricula extending down into lower grades, this book can also be very useful for teachers at any school level.

ISBN: 9780791861912

Proceedings of the 2018 EEC/WTERT Conference

These proceedings are based on presentations from the EEC/WTERT 2018 Conference hosted by The Earth Engineering Center at The City College of New York in October 2018. The conference included speakers from around the world collectively representing the global perspective on best waste management practices.

ISBN: 9780791861950

Pumps and Compressors

Pumps and compressors are ubiquitous in industry, used in manufacturing, processing, and chemical plants, HVAC installations, aerospace propulsion systems, medical applications, and everywhere else where there is a need to pump liquids or circulate or compress gasses. This well-illustrated handbook covers the basic function, performance, and applications for the most widely used pump and compressor types available on the market today.

ISBN: 9781119534143

The Monte Carlo Ray-Trace Method in Radiation Heat Transfer and Allied Optics

This book offers the most modern and up-to-date approach to radiation heat transfer modelling and performance evaluation of optical instruments. The Monte Carlo ray-trace (MCRT) method is based on the statistically predictable behavior of entities, called rays, which describe the paths followed by energy bundles as they are emitted, reflected, scattered, refracted, diffracted, and ultimately absorbed.

ISBN: 9781119518518

Thermal Design of Liquid Cooled Microelectronic Equipment

This book emphasizes providing practical solutions to thermal issues related to high power systems where liquid cooling is required. The book serves as a general thermal design guide for any liquid cooled systems with the main focus on microelectronic equipment that includes digital and/or analog devices.

ISBN: 9780791861936

The Unwritten Laws of Engineering, Second Edition

On the 75th anniversary of its original publication, this new, second edition of the 1944 classic serves as a crucial compilation of "house rules," or a professional code. It addresses three areas: what the beginner needs to learn at once; "laws" relating chiefly to engineering executives; and purely personal considerations for engineers.

LIBRARIAN SERVICE CENTER ON THE ASME DIGITAL COLLECTION

EMPOWER YOUR ENGINEERING & RESEARCH COMMUNITIES

ASME's publishing portfolio supports the core mission of the society itself: to serve as an essential resource for professionals seeking engineering solutions to global challenges to benefit humanity.

As a mission-driven, not-for-profit scholarly publisher, we are proud of our partnership with the librarian community and are devoted to supporting librarians in the widest possible dissemination of our content to their student and research community.

The Librarian Service Center is YOUR destination for important resources:

- **Product information** about The ASME Digital Collection and other ASME publishing initiatives
- **Purchase options** for site licenses and consortia, plus pricing and policies, and availability
- **Tools** to help you manage your account
- **Promotional materials and a newsletter** to keep you better informed about new ASME publications and initiatives and to share with your user community
- **Discussion papers** to provide you with insights into important issues facing librarians
- **Author submission resources** of use to the wider library community
- **Tips** about how to sign up for a variety of email publication alerts

To access the Librarian Service Center on The ASME Digital Collection, visit
<https://asmedigitalcollection.asme.org/pages/Librarians>

Advance your engineering studies and research with the **ASME Digital Collection**, an essential resource for professionals seeking engineering solutions to global challenges.
