

ASME B31.4-2016
(Revision of ASME B31.4-2012)

Pipeline Transportation Systems for Liquids and Slurries

ASME Code for Pressure Piping, B31

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME B31.4-2016
(Revision of ASME B31.4-2012)

Pipeline Transportation Systems for Liquids and Slurries

ASME Code for Pressure Piping, B31

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: March 31, 2016

The next edition of this Code is scheduled for publication in 2019. This Code will become effective 6 months after the Date of Issuance.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Code. Interpretations, Code Cases, and errata are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME Web site under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting “Errata” in the “Publication Information” section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assumes any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Foreword	vi
Committee Roster	ix
Introduction	xi
Summary of Changes	xiii
Chapter I Scope and Definitions	1
400 General Statements	1
Figures	
400.1.1-1 Diagram Showing Scope of ASME B31.4 Excluding Carbon Dioxide Pipeline Systems	3
400.1.1-2 Diagram Showing Scope of ASME B31.4 for Carbon Dioxide Pipeline Systems	4
400.1.1-3 Diagram Showing Scope of ASME B31.4 for Slurry Pipeline Systems	5
Chapter II Design	11
401 Loads	11
402 Calculation of Stresses	13
403 Criteria for Pipelines	18
404 Criteria for Fittings, Assemblies, and Other Components (Alternatively, Criteria for Components)	24
Figures	
404.3.3.1-1 Reinforced Extruded Outlets	27
404.3.4-1 Welding Details for Openings With Complete Encirclement Types of Reinforcement	29
404.3.4-2 Welding Details for Openings With Localized-Type Reinforcement	30
404.3.4-3 Welding Details for Openings Without Reinforcement Other Than That in Header and Branch Walls	31
404.3.5-1 Reinforcement of Branch Connections	32
Tables	
402.1-1 Flexibility Factor, k , and Stress Intensification Factor, i	14
403.2.1-1 Weld Joint Factors Applicable to Common Pipe Specifications	19
403.3.1-1 Allowable Values for Pipeline System Stresses	20
404.3.4-1 Design Criteria for Welded Branch Connections	31
Chapter III Materials	37
423 Materials — General Requirements	37
425 Materials Applied to Miscellaneous Parts	38
Table	
423.1-1 Material Standards	39
Chapter IV Dimensional Requirements	41
426 Dimensional Requirements for Standard and Nonstandard Piping Components	41
Table	
426.1-1 Dimensional Standards	42

Chapter V	Construction, Welding, and Assembly	43
434	Construction	43
435	Assembly of Piping Components	56
Figures		
434.8.6-1	Acceptable Butt Welded Joint Design for Equal Wall Thicknesses	48
434.8.6-2	Acceptable Butt Welded Joint Design for Unequal Wall Thicknesses	49
434.8.6-3	Recommended Attachment Details of Flanges	51
Table		
434.6-1	Minimum Cover for Buried Pipelines	45
Chapter VI	Inspection and Testing	58
436	Inspection	58
437	Testing	59
Chapter VII	Operation and Maintenance Procedures	62
450	Operation and Maintenance Procedures Affecting the Safety of Liquid and Slurry Transportation Piping Systems	62
451	Pipeline Operation and Maintenance	63
452	Pump Station, Terminal, and Storage Facilities Operation and Maintenance	72
453	Corrosion Control	73
454	Emergency Plan	73
455	Records	74
456	Qualifying a Piping System for a Higher Operating Pressure	74
457	Abandoning a Piping System	75
Figures		
451.6.2.2-1	Type I Interaction	65
451.6.2.2-2	Type II Interaction	65
Tables		
451.6.2.9-1	Acceptable Pipeline Repair Methods (Nonindented, Nonwrinkled, and Nonbuckled Pipe)	68
451.6.2.9-2	Acceptable Pipeline Repair Methods for Dents, Buckles, Ripples, Wrinkles, Leaking Couplings, and Defective Prior Repairs	70
Chapter VIII	Corrosion Control	76
460	General	76
461	External Corrosion Control for Buried or Submerged Pipelines	76
462	Internal Corrosion Control	79
463	External Corrosion Control for Pipelines Exposed to Atmosphere	80
464	Pipelines in Arctic Environments	81
465	Pipelines in High-Temperature Service	81
466	External Corrosion Control for Thermally Insulated Pipelines	82
467	Stress Corrosion and Other Phenomena	83
468	Records	83
Chapter IX	Offshore Liquid Pipeline Systems	84
A400	General Statements	84
A401	Design Conditions	85
A402	Calculation of Stresses	87
A403	Criteria for Pipelines	91
A404	Criteria for Fittings, Assemblies, and Other Components (Alternatively, Criteria for Components)	91
A405	Pipe	92
A406	Other Design Considerations	92
A421	Design of Pipe-Supporting Elements	93
A423	Materials — General Requirements	93
A434	Construction	93

A436	Inspection	94
A437	Testing	95
A450	Operation and Maintenance Procedures Affecting the Safety of Liquid and Slurry Transportation Piping Systems	95
A451	Pipeline Operation and Maintenance	95
A452	Pump Station, Terminal, and Storage Facilities Operation and Maintenance	96
A454	Emergency Plan	97
A460	General	97
A461	External Corrosion Control for Offshore Submerged Pipelines	97
A463	External Corrosion Control for Pipelines Exposed to Atmosphere	97
Table		
A402.3.5-1	Design Factors for Offshore Pipeline Systems	88
Chapter X Carbon Dioxide Pipeline Systems		
B400	General Statements	99
B423	Materials — General Requirements	99
B434	Construction	99
B437	Testing	99
B451	Pipeline Operation and Maintenance	99
B454	Emergency Plan	100
Chapter XI Slurry Pipeline Systems		
C400	General Statements	101
C401	Loads	101
C403	Criteria for Pipelines	101
C404	Criteria for Fittings, Assemblies, and Other Components (Alternatively, Criteria for Components)	102
C423	Materials — General Requirements	102
C426	Dimensional Requirements for Standard and Nonstandard Piping Components	102
C434	Construction	102
C437	Testing	104
C451	Pipeline Operation and Maintenance	104
C454	Emergency Plan	104
C457	Abandoning a Piping System	104
C460	General	104
C461	External Corrosion Control for Buried or Submerged Pipelines	104
C468	Records	104
Tables		
C423.1-1	Material Standards	103
C423.1-2	Material Standards Not Applicable for Slurry Piping Systems From Table 423.1-1	103
C426.1-2	Dimensional Standards Not Applicable for Slurry Piping Systems From Table 426.1-1	103
Mandatory Appendix		
I	Referenced Standards	105
Nonmandatory Appendices		
A	Submittal of Technical Inquiries to the B31 Pressure Piping Committee	108
B	Publications That Do Not Appear in the Code or Mandatory Appendix I but May Be of Informational Benefit	110
Index		111
